E-MU Production Tools Software Bundle

Everything you need to create, record, edit, master and burn is in the box, including:
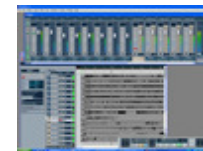

Cakewalk SONAR LE - Audio/MIDI Production

SONAR LE is production environment for Windows that provides musicians with a host of potent features that include: 64 audio and 256 MIDI tracks; 24-bit/192kHz recording support; 14 studio quality real-time effects and 6 MIDI effects; audio loop construction tools; dynamic console view; multi-port graphical drum grid editor; multitrack piano roll view; staff notation; ReWire 2.0 support; DirectX/DXi and VST/VSTi support; MIDI clock and MTC slave; Cyclone DXi groove sampler; Audio Simulation's Dreamstation soft synth DXi; and more. Registered owners of SONAR LE will be able to upgrade to the full version of SONAR Studio Edition for a special price.
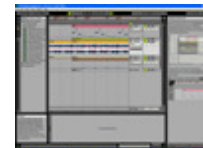

Steinberg Cubase LE - Audio/MIDI Production

Cubase LE is a powerful music software workstation that offers: 48 audio and 64 MIDI tracks; 24-bit/192kHz professional audio quality; a full set of audio effects plug-ins; LM-7, VB-1 and USM virtual instruments; and MTC, MIDI-clock and VST System Link support. Steinberg offers all registered Cubase LE customers to purchase the virtual instruments set (SE versions) at a special price, and Cubase LE is upgradeable to Cubase SX/SL.

Ableton Live Lite 4 for E-MU Systems - Audio/MIDI Production

Ableton Live is the music-production solution that allows you to spontaneously compose, record, remix, improvise and edit your musical ideas. Live brings your acoustic, electronic and virtual instruments, as well as your digital audio recordings, together in a single interface with unparalleled ease of use. Live's specialty is composition by improvisation. Record musical ideas, combine or create new songs, and compose on the fly, and offers complete multitrack recording and editing for any acoustic source, hardware synthesizer or software instrument.

Steinberg WaveLab Lite - Audio Editor
WaveLab Lite is a light version of the popular mastering and wave editing program.

IK Multimedia Amplitube LE - Guitar Amp & FX Modeling Plug-In

AmpliTube® is a powerful plug-in for guitar players that puts a virtually unlimited array of tones and effects at your fingertips. AmpliTube's stomp-box, post-effects and amp simulation capabilities make it easy to craft everything from rich, vintage tones to unique cutting-edge sounds.

SFX Machine LT - Audio Multi-effects Plug-in

SFX Machine LT is a powerful audio multi-effects plug-in for musicians and sound designers, featuring 21 presets such as BackwardsFragment, RoboTalk, Sitar Drone and Stutter. The plug-in provides up to six sliders for fine-tuning of each preset and allows automated parameter control via a simple "MIDI Learn" interface. It also provides a Randomize button for quick experimentation. SFX Machine LT is a subset of the RT version, which includes hundreds of presets, and a special upgrade price is available for registered E-MU users.

E-MU Proteus X LE - Desktop Sound Module

Proteus X LE is a 24-bit/192kHz VST instrument for your PC that offers the pristine sound quality and powerful Z-Plane filters of E-MU's powerful Proteus X Desktop Sound Module, plus over 1,000 sounds from E-MU's legendary Proteus 2000 sound module. You can also expand your Proteus X LE with any soundset from E-MU's comprehensive sound library. Proteus X LE offers you an intuitive sound module interface to quickly dial in your sounds, with easy-to-use librarian and search functions to find that perfect preset in seconds, as well as two discrete effects processors with comprehensive MIDI modulation per preset.

The E-mu Production Tools Bundle is pre-installed on all Red Submarine Audio Computers supplied with E-mu soundcards.
