

ENGLISH ELECTRIC

High-performance network noise isolator

In-line network noise reduction for streaming media

- Self-powered - converts unwanted noise to heat
- Targeted filtering reduces damaging network noise
- Galvanic isolation blocks low-frequency noise and reduces high-frequency noise whilst maintaining data quality
- Discreet yet powerful and easy to install
- Multiple EE1 units within a network can bring further improvements

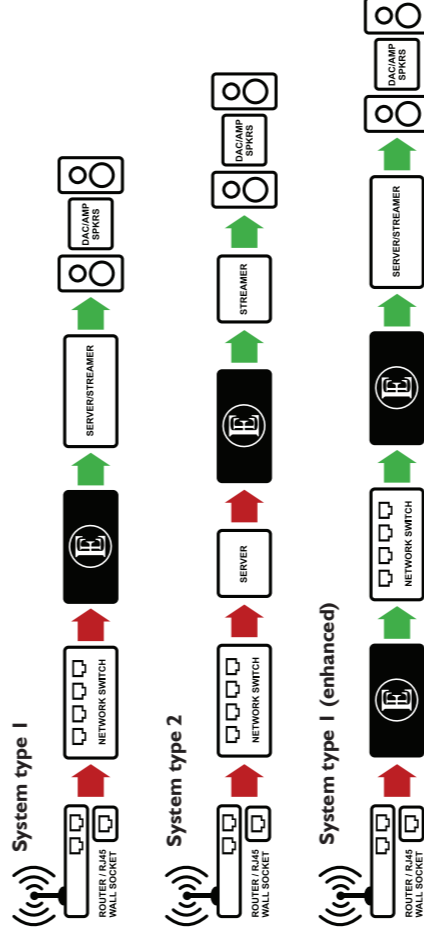

The EE1 network noise isolator is designed to sit discreetly between ethernet cables within a streaming audio/video system and can drastically reduce noise whilst allowing digital signals to pass unhindered. Digital signals are robust but are often accompanied by a degree of noise - usually transferred from home network devices. The EE1, like the EE 8Switch and 16Switch, continues our efforts to prevent noise from affecting music/image data and system performance.

Installation

For optimum results please ensure the > direction markings on the EE1 unit follow the direction of the music/data signal and refer to the diagrams below when positioning the unit/s within your system.

Installing the EE1 will require an additional ethernet cable. We recommend using Chord Company streaming (Ethernet) cables throughout your streaming audio system. If using cables of varying quality we suggest connecting the superior model/s as far along the signal path as possible, between the EE1 and the server/streamer (system type 1) or between the EE1 and streamer (system type 2).

If further noise-reduction/enhancement is desired, a second EE1 can be installed between router and network switch as per 'System type 1 enhanced' diagram.

Warranty

English Electric products are covered by our 24-month (return-to-base) warranty from the initial date of purchase, covering defective materials and workmanship. This warranty is applicable worldwide. It is transferable within the warranty period. Proof of purchase may be required.

Consumer rights applying under the laws of the country of purchase are not adversely affected by the terms of our warranty. Some jurisdictions do not permit the exclusion of implied warranties and/or conditions and do not allow the exclusion or limitation of certain damages. In this case, therefore, the exclusions detailed in this Limited Warranty may not apply.

Any provision of this Limited Warranty which is, or is deemed to be unenforceable in any jurisdiction, shall be severable, without in any way invalidating the remaining provisions in this Limited Warranty. Any such unenforceability shall not make that provision unenforceable in any other jurisdiction.

Repairs under warranty

Please do not attempt to open, disassemble or attempt to repair the product – repairs must be conducted by an authorised repair agent. Opening the casework for any reason will damage the product and void the manufacturer's warranty.

Should your English Electric product develop an issue, please return it to an authorised Chord Company/ English Electric retailer or distributor. They will arrange the shipping back to ourselves for priority attention. If there is a retailer or distributor near you, please contact us.

Warranty exclusions

Safety advice

The EE1 has a factory-sealed casing. In the extremely unlikely event of a problem with your EE1, please do not try to open it as this may damage the unit and invalidate your warranty.

Do not connect anything other than RJ45 plugs into its sockets and like many electronic devices, please avoid excessive static.

Don't allow the EE1 unit to come into contact with liquids, including cleaning fluid, or place any weight onto the EE1 after installation.

English Electric declares that the EE1 is in conformance with:

2011/65/EU – Restriction of Hazardous Substances Directive (RoHS)
2012/19/EU – Waste of Electrical and Electronic Equipment (WEEE)
