

MLC S_ZERO 100

Zero-Compromise Powerhouse

Lay down your guitar tracks with one of the most exclusive and high-quality guitar amps in current production. The MLC S_Zero 100 is a hand-built boutique amp known for its rich, detailed tone and broad tonal palette.

With the plugin version, you get a sonic powerhouse that stands out from the crowd both in terms of accuracy and the vast tonal ground it covers.

The MLC S_Zero 100 plugin is also the first product to feature Bogren Digital's unique IRDX technology, adding unprecedented dynamic and harmonic detail to the speaker cab emulations.

IRDX TECHNOLOGY

When it comes to achieving lifelike guitar speaker emulation, the new IRDX technology is a quantum leap forward.

The technology breathes life into the guitar sound by adding dynamic and true-to-life behavior to static speaker impulses. Impulse Responses are excellent at capturing the tonality and resonance of a guitar cabinet, but real-life guitar speakers react dynamically to the input from the amplifier. They move air, compress, and break up depending on how hard they are being pushed by the amp.

This is the gap IRDX is designed to bridge - it uses advanced machine learning methods to reconstruct the difference between a real cab and an impulse response.

SYSTEM REQUIREMENTS

- Available as VST3 / AU / AAX / Standalone.
- Windows 10 or newer.
- Mac OS 10.13 or newer (Intel & Apple Silicon Native).

TRIAL

All our plugins have a 14-day free trial. You can still use the plugin for 60 seconds before it shuts down.

LICENSE

Your licenses can be found:

- On the purchase confirmation page.
- In the purchase confirmation email.
- After logging into your Bogren Digital account.

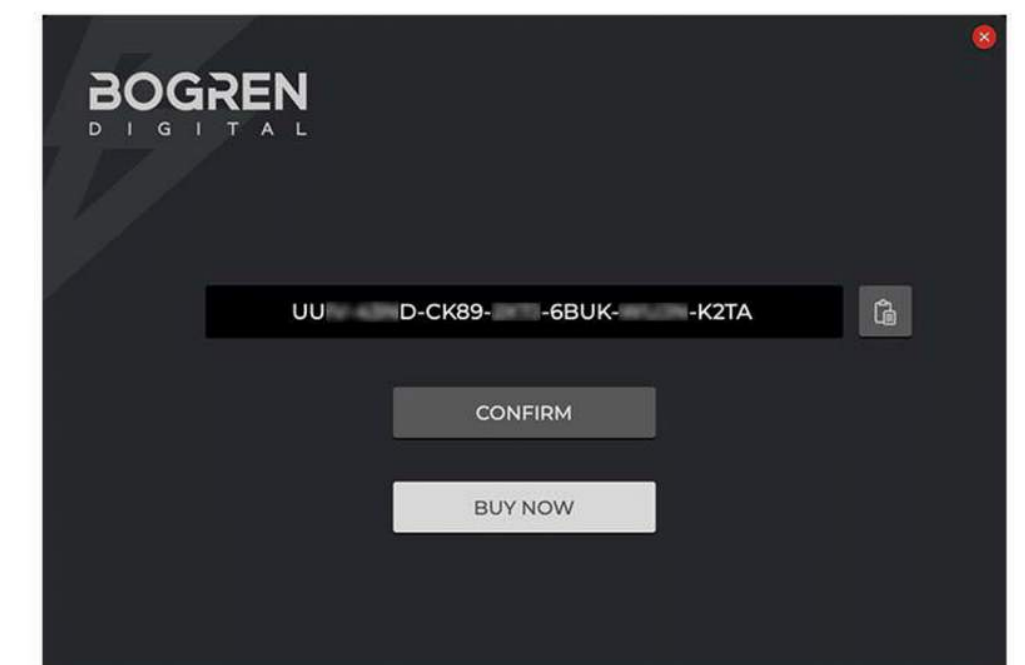

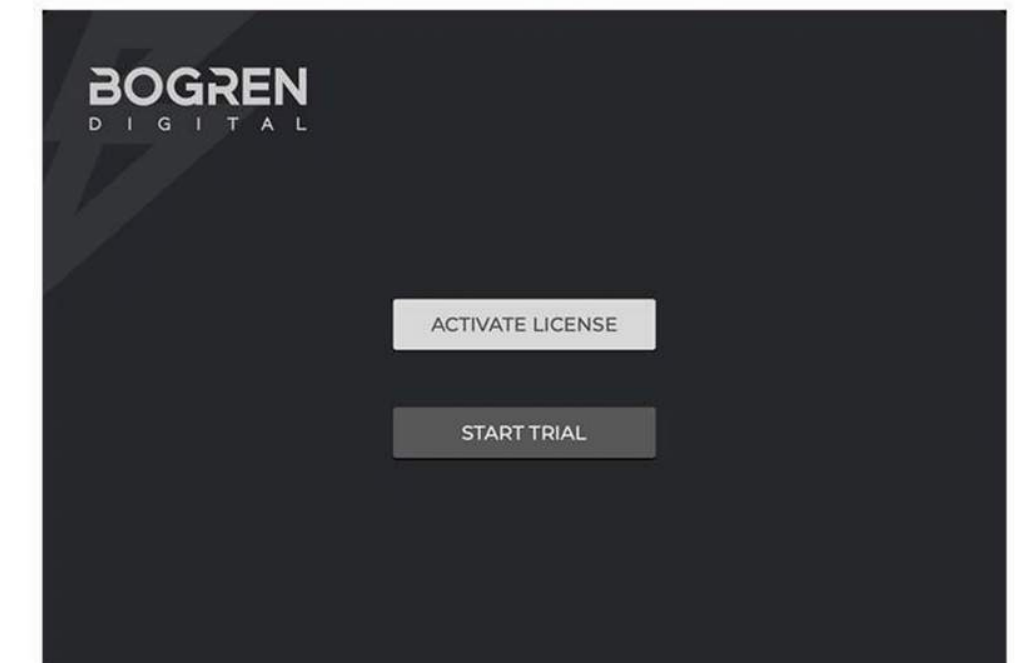

ACTIVATE YOUR LICENSE

1. Click the menu icon in the top right corner of the plugin and go to **License info**.

2. Click on '**ACTIVATE LICENSE**'

3. Paste your code and click '**CONFIRM**'

4. You are now **READY TO ROCK!**

FILE LOCATIONS

Bogren Digital Plug-ins are installed in the default locations for each plug-in format (VST3, AAX, AU, Standalone), unless a different, custom location is selected during installation.

MacOS

AudioUnits: Macintosh HD / Library / Audio / Plug-ins / Components /

VST3: Macintosh HD / Library / Audio / Plug-ins / VST3 /

AAX: Macintosh HD / Library / Application Support / Avid / Audio / Plug-ins /

Standalone App: Macintosh HD / Applications /

Windows

64-bit VST3: C:\ Program Files \ Common Files \ VST3 \

64-bit AAX: C:\ Program Files \ Common Files \ Avid \ Audio \ Plug-Ins \

64-bit Standalone: C:\ Program Files \ Bogren Digital \

SETTINGS MENU

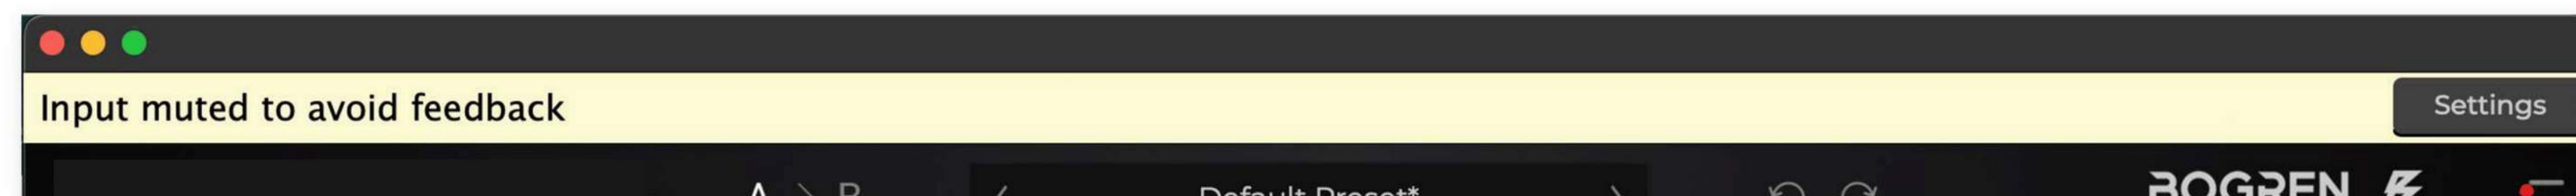

The menu with settings and preferences is located in the top-right corner of the plugin.

INPUT/OUTPUT (Available only in standalone version).

FEEDBACK PROTECTION

When you launch the plugin for the first time, the input is muted to avoid unwanted feedback.

Once you set up your input and output, it is safe to turn off the mute option.

INPUT: Select the input device.

OUTPUT: Select the output device.

INPUT CHANNELS

Select which channel on the audio interface should be listening for guitar input. In most cases, you will want to select only one channel.

Press CMD (Mac) or CTRL (Windows) + click to select two input channels, if needed.

TUNER

Opens the tuner window

RIFF RECORDER

Press to start or stop recording your riffs.
Keyboard shortcut « r »

METRONOME

The standalone version of MLC Subzero comes with a built-in metronome so you can stay sharp with your guitar playing skills.
Use Right-click to start or stop the metronome without opening its UI.

RIFF FOLDER

Open your 'riff ideas' folder. The recording location can be set in the global preferences menu.

QUALITY SWITCH

Set to 'Normal' for most uses or 'Ultra' for a zero-compromise sound. This increases the oversampling and accuracy of modeling.

PLUGIN CONTROLS

METRONOME

1. BPM COUNTER

Set the metronome speed. You can change the speed by double clicking, or dragging the number up or down.

2. PLAY/STOP

Starts and stops the metronome.

You also can start and stop the metronome directly from the main window by right-clicking the metronome icon.

3. TAP TEMPO

Tap here or press the « t » key to set the desired tempo.

4. TEMPO SLIDER AND BUTTONS

Move the slider left/right or press the «-» or «+» buttons to adjust the tempo.

Press «-» or «+» keyboard keys to make adjustments by 10 bpm or CTRL (Windows) or CMD (Mac) together with the «-» or «+» keys to make 1 bpm adjustments.

5. BEATS

Set the number of beats (dots) per bar. The most common setting is 4.

6. BEATS AND ACCENTS

Every beat is represented by a circle. Click any circle to turn it into an accent.

7. NOTE VALUE

Choose the desired value for the note played: quarter, eighth, sixteenth, or triplets.

8. SPEED TRAINER

Automatically increasing the tempo of the metronome over time increases practice difficulty without taking your hands off of the guitar.

9. METRONOME SOUND

Choose one of the 3 different metronome sounds.

10. VOLUME

Open the volume slider to adjust the volume of the metronome.

POST EFFECTS SECTION

MAX DELAY

ON / OFF: Engage / disengage the delay pedal.

TAP TEMPO: Tap the desired delay tempo to sync up with music by ear.

MIX KNOB: Determines how much of the wet signal will be blended with the dry one.

TIME KNOB: Delay Time. Set the interval between repeats. The values can be in milliseconds or notes, depending on the sync switch position.

FEEDBACK KNOB: Delay feedback. Determines how many repeats you will hear.

SYNC SWITCH: Delay Sync. Choose between milliseconds or note values to control the repeat interval length.

PING PONG SWITCH: This will make the signal bounce between left and right speaker. Enabled only if stereo output is available.

WET VERB

ON / OFF: Engage / disengage the reverb pedal.

MIX KNOB: Determines how much of the wet signal will be blended with the dry one.

SIZE KNOB: Sets the length and size of the reverb.

LOW CUT KNOB: Frequencies below this value will not go through reverb. Increasing the value can help with clarity.

PRE DELAY KNOB: Sets the amount of milliseconds to wait before reverb plays. Increasing can help with clarity.
