

A linear power supply for up to six sources

Power Box DS3 Sources

9V, 15V and 18V linear power supply

The Power Box DS3 Sources is a linear power supply for a Pro-Ject 15V turntable and up to 5 Pro-Ject DS series sources: two 9V, three 18V. It delivers clean power to all units and provides power cable management by cutting down on unnecessary "wall-warts" in your power strip.

The Power Box DS3 Sources is available for MSRP 699 € (incl. VAT).

At Pro-Ject dealers in February 2023.

A quality linear powersupply for clean audio reproduction

Sixfold the power in a single case

The Power Box DS3 Sources is the best power supply for your Pro-Ject DS series components. Placing the power supply outside the main component avoids potential noise and audio signal contamination. Up to six tailored outputs can run a Pro-Ject turntable and five Pro-Ject sources. The linear power supply outperforms switching power supplies by supplying clean energy via a heavy torodial transformer and sophisticated high capacity filtration. The resulting sound quality, is impressive. In addition to the sonic improvements, the Power Box DS3 Sources also manages a neater cable solution avoiding a tangled cable mess. Available in black or silver.

Designed & handmade in Europe

The new Power Box DS3 Sources is carefully designed and handmade in Europe. We aim to develop a technically flawless device in a housing that is only as big as necessary to save raw materials. Due to the timeless design & rigid aluminium casework, the Power Box DS3 Sources is built for eternity. With high-quality materials and components and well-thought-out design, we want to pioneer the industry.

- All-in-one power supply capable of 6 components
- Cleanest power using non-switching power supply
- 5 Box Design component & 1 turntable power output
- Not suitable for integrated & power amplifiers
- Soft-start-system: no current-inrush
- Audio type toroidal transformer
- Main isolating transformer with copper foil shielding
- Voltage rectification with precise regulation
- High filtration capacity (10.000 μ F)
- Low ESR capacitors
- Low noise components with surge protection
- Rigid aluminium casing protects against interference
- Available in black or silver
- Magnetic wooden side panels available separately
- Made in Europe

The history of Pro-Ject

Pro-Ject was founded in 1991, during the onslaught of the compact disc and CD players, with the mission to offer the best analogue experience for a reasonable price. In a time where the digital audio media had been on the rise, and vinyl was declared as outdated and dead, Heinz Lichtenegger kept his belief in the simple but best way to enjoy music – turntables.

We aim to get as many people as possible into the wonderful hobby that is HiFi audio and to deliver a real stereo experience for the lowest cost possible. The best way to start is with a proper turntable. We want to give the customers back the right to choose what they need, without overblowing our products with unnecessary features.

Here at Pro-Ject, we strive to create astonishing products with impeccable value. We only use the best components for the price and manufacture our handmade goods solely in Europe. With an eye for future trends, we are always trying to fit the needs of the market.

Our passion and drive have been recognized by many acclaimed magazines. We have won multiple awards from the renowned HiFi press for our turntables and electronics over the years. Our products have also been used in countless TV shows and movies.

With cutting edge technologies and machines, we can create visually pleasing products without losing the eye for the finest details. We closely work with partners from the music industry, such as Universal Music Group (The Beatles), Third Man Records (Jack White), The Rolling Stones, Parov Stelar, or the world-famous Hard Rock Café. Many industry leaders also cooperate with us, like the Vienna Philharmonic Orchestra or Ortofon for their jubilees. With these partners, we create special limited edition products to give our customers even more choices.
