### **1. INTRODUCTION**

This 4K UHD<sup>+</sup> HDMI over HDBaseT receiver uses HDBaseT 3.0, the newest generation of HDBaseT technology, and when combined with a compatible transmitter is the perfect solution for extending full bandwidth (18Gbps) HDMI 2.0, 4K@60Hz (4:4:4, 8-bit) video with HD audio via a single run of Cat.6A/7 cable over distances of up to 40 meters. Multiple control and data signals may also be extended along with the audio and video, including bi-directional IR and RS-232.

This receiver is ideal for use in any video extension scenario, but it excels when latency-free, uncompressed, high resolution video is critical, such as medical installations, live conferences, and education.

### 6. OPERATION CONTROLS AND FUNCTIONS

#### **6.1 Front Panel**

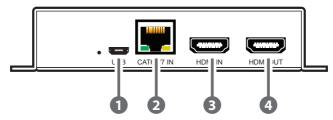

- **RS-232 4-pin Terminal Block:** Connect to a PC, laptop, or serial controllable device with a 4-pin adapter cable for the extension of RS-232 signals between both ends of the HDBaseT connection.
- IR 4-pin Terminal Block (In/Out): Connect to both an IR Blaster and Extender using a 4-pin Y-adapter cable to transmit and receive IR control signals and extend them to devices connected to the other end of the HDBaseT connection.
- **3 Power LED:** This LED will illuminate to indicate the unit is on and receiving power.
- LINK LED: This LED will illuminate solidly when a live connection with a compatible receiver is active.

**6.2 Rear Panel** 

- **USB Port (Micro-B):** This port is reserved for firmware update use only.
- CAT6A/7 IN Port: Connect to a compatible HDBaseT transmitter with a single Cat.6A/7 cable for extension of all data signals. Power via PoH will also be supplied to this unit when connected to a compatible PSE transmitter.

Note: A compatible PoH (PSE) transmitter is REQUIRED to power this receiver. Transmitters from other brands may not be compatible.

**B** HDMI IN Port: Connect to HDMI source equipment such as a media player, game console, or set-top box.

Note: If this HDMI input is connected, its video will automatically be output over the local HDMI output, overriding any current HDBaseT video source.

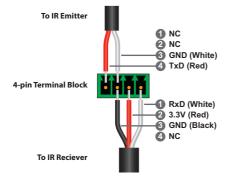

HDMI OUT port: Connect to an HDMI TV, monitor, or amplifier for digital video and audio output.
