

# DIAMOND 12 Series

The all-new DIAMOND 12 Series is the best DIAMOND yet!

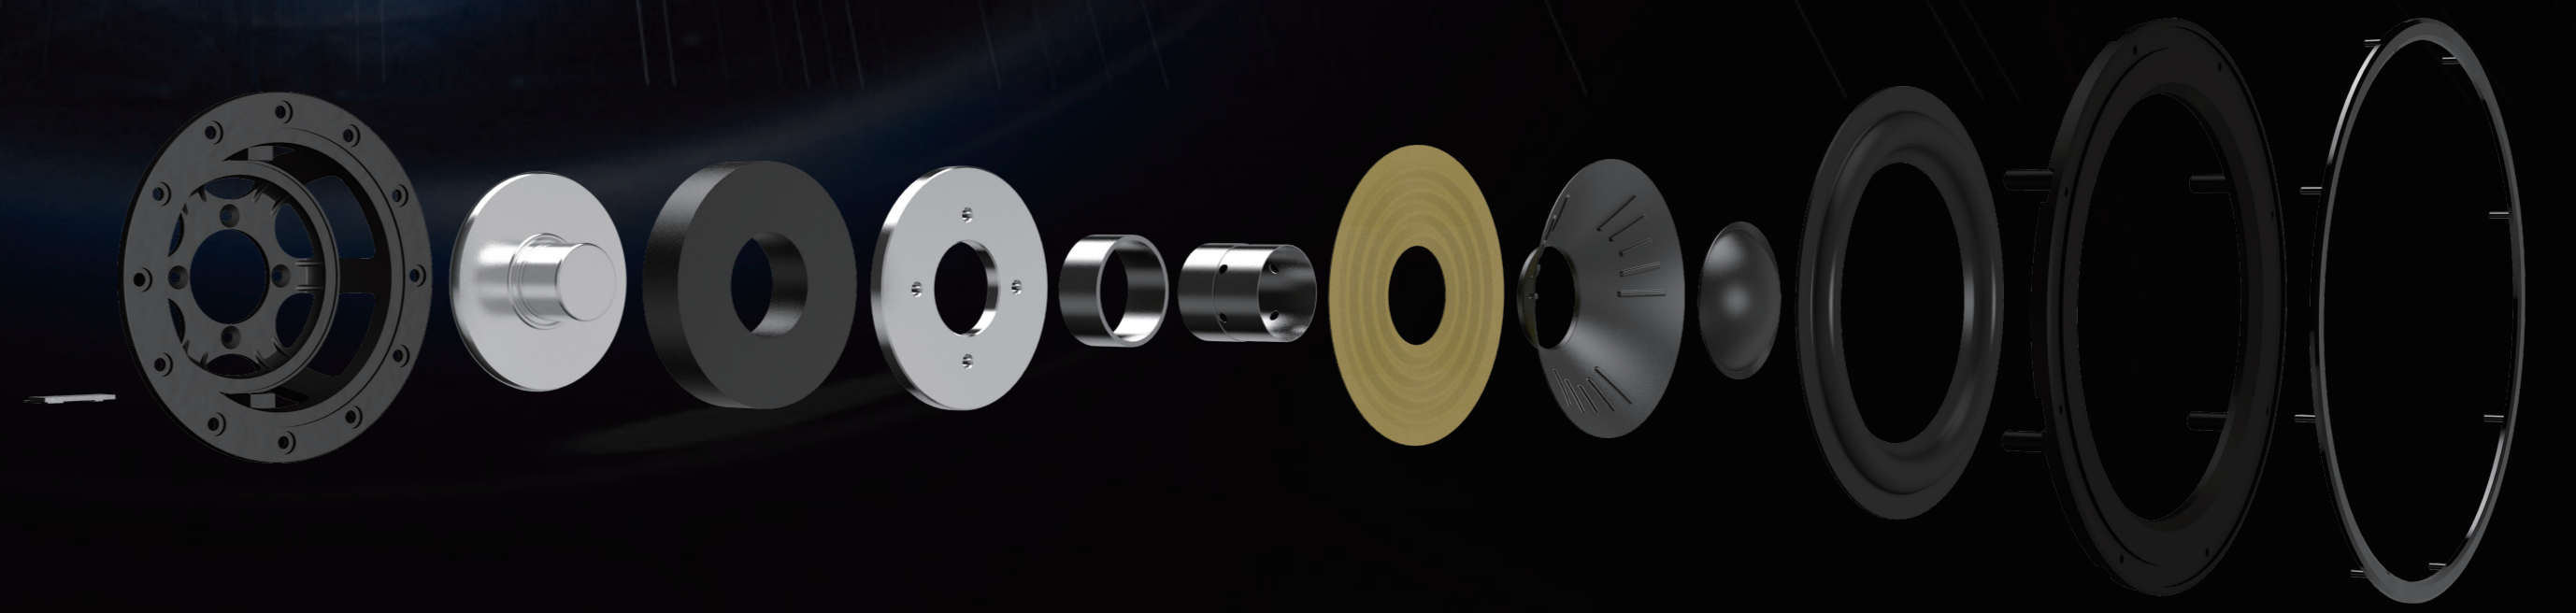

## DIAMOND highs

The 25mm woven polyester film has a high-loss coating to deliver open and smoothly extended high frequencies. The magnet system and the front plate have been optimised for wide dispersion and uncompressed behaviour.

## Klarity affords focus

Klarity™ cone material is formulated from a blend of Polypropylene and mica to add stiffness and reduce flexing, enabling a lightweight cone with high rigidity, low colouration and lightning-fast response.

## Brace yourself

Intelligent Spot Bracing connects opposite walls with a specific form of the wood brace to achieve an optimal reduction of cabinet resonance. These braces are precisely modelled by computer simulation for further improvement.
