

DIGITAL SIGNAL PROCESSING (DSP) PRESETS

The SubZero L48/L48B includes built-in presets, so you get the optimum sound for your venue. The advanced Digital Signal Processing (DSP) gives you clarity to suit speech, brightness to suit music, and bass boost for parties.

Each of the four presets have been carefully fine-tuned by professional audio engineers and are easily selected at the touch of a button. We've taken care of the technology, so you can concentrate on making your event the best it can be.

FLAT

Completely neutral. No DSP processing is applied, so you hear everything exactly as it is.

MUSIC

This mode caters to DJ and music playback applications, offering a full-range audio experience with an emphasis on pronounced bass and brilliant high frequencies.

LIVE

Cut through audiences for a pronounced sound, with a slight low-end boost to add 3D depth.

SPEECH

Tailored for speech clarity, this mode attenuates low-frequency vocal resonance, boosts high frequencies critical for intelligibility.

HEIGHT CONFIGURATION

1

For smaller rooms and seated audiences

HEIGHT: 0.89m
