

THE NEW GRETSCHE RENOWN

NEW STYLING. ENHANCED FEATURES. THE SAME GREAT GRETSCH SOUND.

MEET THE NEW GRETSCH RENOWN

By adding classically distinctive appointments and new high-performance features, the new Renown Series is poised to continue the rich legacy of legendary Gretsch drum sets.

SOME CHANGE IS GOOD

The concept of the Renown redesign was to give the series fresh visual appeal and enhance sonic performance, while preserving its classic Gretsch vibe and spirit. The newly designed round, two-toned badge features gleaming silver artwork embossed over a black nickel background.

LOOKS GREAT, WORKS BETTER

The Renown's re-engineered GTS system represents a huge advance in tom suspension technology. Not only is the new design significantly lighter in weight and allows greater visibility of the shell, the new GTS does an even better job at maximizing resonance.

The low-profile horizontal GTS bars grab the drum at four points for a stable, evenly-distributed fit.

NEW Gretsch "T-Wing" wingnuts

NEW Low-profile Gretsch GTS

NEW Gretsch G1-9035 hinged brackets/memory locks

NEW Round Renown badge

THE T STANDS FOR TIMELESS

To make tom mounting quicker and easier, the redesigned hinged GTS tom bracket/memory lock system is now lower in mass and features the classic easy-to-handle Gretsch "T-Wing" wing screw.

The T-Wing screw design is also incorporated into the adjustable telescoping bass drum spurs, the floor tom brackets and the clam-shell ball-and-socket tom clamps, which are included with all Renown sets.

SOME THINGS DIDN'T NEED TO CHANGE

The Renown has always been revered for its rock-solid craftsmanship and excellent sonic performance. Gretsch still uses the proven and unique Renown formula that combines North American Rock Maple with a slightly softer maple species. Each drum is expertly completed with smooth 30° bearing edges and Gretsch's exclusive Silver Sealer interior finish. Heavy-duty Gretsch die-cast hoops are fitted to all tom and snare shells and classic Gretsch lugs adorn each drum. This Gretsch-engineered shell/hoop combination produces explosive attack and power that is rich with warm, low-end timbre.

REMO DRUM HEADS

All Renown kits are equipped with Remo® drum heads for powerful, penetrating tones. With this incredible combination of head, shell and hoop, the new Gretsch Renown sounds, feels and plays distinctively Gretsch.

RESPECT THE PAST. FORGE THE FUTURE.

With its compelling package of highlights, the Renown Series brings drummers a new level of excitement and classic styling, while maintaining Gretsch's time-honored reputation for high performance drum sets that deliver legendary sound.

Stands and cymbals not included.

RENOWN SPECIFICATIONS
