

# Power Box RS2 Amp

## Linear power supply

MSRP 999 € (incl. VAT)

Colour options:  

- Power supply for Amp Box RS2
- Replaces original "switching" power supplies
- Significant sound improvement
- Improved sound stage and detail resolution
- Cleanest power using non-switching power supply
- Soft start system avoids current inrush
- Audio type toroidal transformer
- Main isolating transformer with copper foil shielding
- Secondary voltage rectification with precise regulation
- High filtration capacity (40.000  $\mu$ F)
- Low ESR capacitors
- Low noise components with surge protection
- Rigid aluminium casing protects against interference
- Available in silver or black
- Made in Europe

**Input Power supply:** 115V/230V AC

**Output voltage - switchable:**  $\pm 35$  V /  $\pm 45$  V

**Output current:** 4A

**Filtration capacity:** 40.000  $\mu$ F

**incl. accessories:** connection cable to Amp Box RS2

**Dimensions W x H x D:** 206 x 71 x 209 mm

**Weight:** 4700 g

## Cleanest power

The power supply is a very important part of the audio path and significantly contributes to the sonic quality of an audio product. With the new Power Box RS2 Amp you can connect your Amp Box RS2 and benefit from the perfect power contribution.

A linear power supply consists of a massive toroidal transformer, which avoids penetration of interferences from mains into the audio component. The built-in transformer has a much higher power reserve compared to the standard power adapter. It has very low output impedance and in combination with large filtration capability it can easily manage all power needs. Sound staging, darkness of silent backgrounds and small detail resolution will improve strongly and contribute to a far better overall performance of each component.

Power Box RS2 Amp is made in Europe and available in a black or silver full aluminium housing.
