

EXPRESS DJ DJ SOFTWARE WITH USB AUDIO INTERFACE

Mix your music and become the ultimate DJ at any party.

USE THE MP3S ON YOUR COMPUTER TO BECOME THE ULTIMATE DJ AT ANY PARTY.

Easily create professional sounding party mixes with intuitive drag and drop playlist creation and automatic beat matching. Included software will automatically crossfade, align, and tempo adjust your songs for seamless transitions.

The USB audio interface plugs directly into your stereo or sound system, and features a microphone input for adding live vocals to your mix. Use the EQ on the interface box to adjust the sound.

You can save your mixes for listening on your iPod or other personal audio player.

MixMeister Express software is an intuitive approach to professional sound mixing
