

Pro X Kick Pedal

Professional Bass Drum Pedal

Rock-solid response and precise control.

With the Alesis Pro X Kick pedal, you get a professional bass drum pedal built for rock-solid performance. Whether you play an acoustic or electronic set, the Pro X Kick pedal is loaded with heavy-duty adjustable components, making it the right choice for every drummer and the perfect addition to any drumset.

Rugged Toughness

The Pro X Kick pedal is ready to take a beating. Its double-chain drive system gives you explosive power and ultra-tight response, and the entire pedal sits on top of a heavy, solid-steel power plate. The Pro X Kick pedal is going to stay put, wherever you put it down. A four-sided beater with easy height adjustment and memory lock, make the Pro X Kick pedal perfect for drummers who want precise attack and ultimate control over their kick drum.

Precision Control

The Pro X Kick pedal comes ready to adapt to any style of drumming. With gearless stroke-length adjustment, an ultra-high tension adjustable spring and a toothless X Cam, the Pro X Kick pedal allows you to dial in the exact feel you want, providing power, smooth precision and speed.

One of the Pro X Kick pedal's most convenient features is its offset hoop clamp—you'll be able to clamp the Pro X Kick pedal to your bass drum in seconds at every gig, giving you more time to play and less time setting up.
