

sE8

SMALL-DIAPHRAGM CONDENSER MICROPHONE
CARDIOID, SUPERCARDIOID & OMNIDIRECTIONAL

sE8

SMALL-DIAPHRAGM CONDENSER MICROPHONE
CARDIOID, SUPERCARDIOID & OMNIDIRECTIONAL

ONE PREAMP. THREE CAPSULES.

THE ACCLAIMED sE8 PLATFORM, NOW AVAILABLE IN THREE POLAR PATTERNS

The sE8 Family combines the acclaimed sE8 small-diaphragm condenser platform with interchangeable Cardioid, Omnidirectional, and Supercardioid capsules, allowing engineers to adapt to virtually any recording or live sound application.

CUSTOM HANDCRAFTED GOLD-SPUTTERED CAPSULES

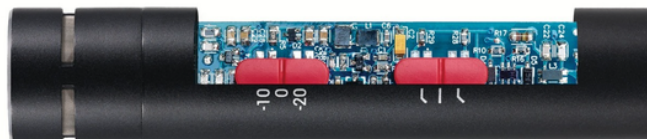

The sE8 Family's handcrafted capsules deliver **exceptional transient response, low self-noise, and a balanced, natural sound signature**. Each capsule is individually tuned to provide consistent performance across all pickup patterns.

HIGH-PERFORMANCE ELECTRONICS

With a very short signal path, no ICs, and specially optimized Class-A electronics, the sE8 is **one of the quietest SDCs** you can buy – and by far the quietest mic in its class.

80 / 160Hz LOW CUT FILTER

Dual low-cut filters help reduce proximity effect in directional capsules and minimize unwanted low-frequency rumble in any recording environment.

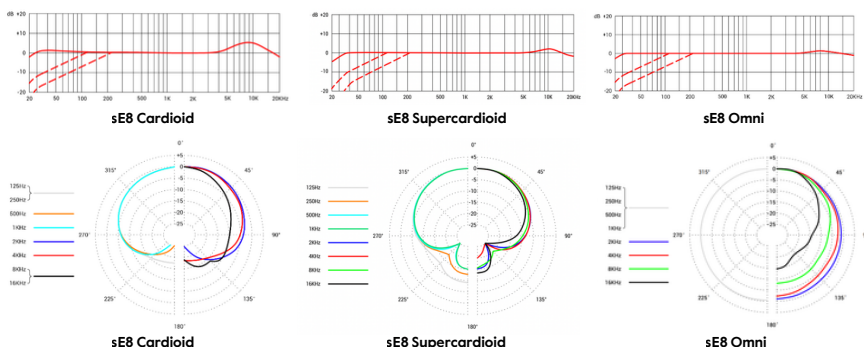

-10dB / -20dB PAD

The integrated 10/20 dB attenuation pad allows the sE8 Family to handle extremely high sound pressure levels. Whether recording **drums, guitar cabinets, brass instruments, or other loud sources**, the pad reduces the microphone's output level to prevent preamp overload while preserving sonic detail and clarity.

CHOOSE YOUR POLAR PATTERN

FREQUENCY RESPONSE & POLAR PATTERN

Cardioid

The versatile studio standard. Ideal for acoustic instruments, overheads, piano, vocals, and general purpose recording applications.

Supercardioid

Provides enhanced side rejection and focused pickup for loud stages, broadcast applications, and situations requiring maximum source isolation.

Omnidirectional

Captures sound naturally from all directions with no proximity effect, making it ideal for room microphones, orchestral recordings, and ensemble performances.

AVAILABLE CONFIGURATIONS

Complete Microphone Sets

- Single microphones
- Factory-matched stereo pairs

Capsule Options

- Single capsules
- Factory-matched capsule pairs

Mix & Match Flexibility

FACTORY-MATCHED STEREO PAIRS

Whether purchased as complete microphone sets or matched capsule pairs, every sE8 Family stereo configuration is factory-matched to exceptionally tight tolerances, ensuring accurate stereo imaging and consistent performance.

Matched microphone pair sets include a **precision stereo mounting bar** and protective **flight case**, providing a complete solution for professional stereo recording applications.

HAND-CRAFTED TRUE CONDENSER CAPSULES
