Kam products are manufactured by: Lamba plc, Unit 1, Southfields Road, Dunstable, Bedfordshire, United Kingdom LU6 3EJ Telephone: (+44) (0)1582 690600 • Fax: (+44) (0)1582 690400 • Email: mail@lambaplc.com • Web: www.lambaplc.com
Due to continuous product development, specifications and appearance are subject to change. © Copyright Lamba plc 2013. E&OE.

Thank you for purchasing this Kam product, we are sure that it will serve you for many years to come.

To optimise the performance of this product, please read these operating instructions carefully to familiarise vourself with the basic operations of this unit. Please retain them for future reference. This unit has been tested at the factory before being shipped to you. To prevent or reduce the risk of electrical shock or fire, do not expose the unit to rain or moisture. To prevent a fire hazard, do not expose the unit to any naked flame sources. Unplug this apparatus during lightning storms or if it is unlikely to be used for long periods of time.

When installing the unit, please ensure you leave enough space around the unit for ventilation. Slots and openings in the unit are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. To prevent fire hazard, the openings should never be blocked or covered.

If the unit is powered by the mains, always handle the power cable by the plug. Never pull out the plug by pulling on the cable. Never touch the power cable when your hands are wet as this could cause an electric shock. Do not tie a knot in the cable. The power cable should be placed such that it is not likely to be stepped on. A damaged power cable can cause a fire or give you an electrical shock. Check the power cord periodically, if you ever find that it is damaged, replace it before using the unit again. Contact your retailer for a replacement.

The voltage of the available power supply differs according to country or region. Be sure that the power supply voltage of the area where this unit is to be used meets the required voltage written on the unit.

The lightning flash symbol inside a triangle is to alert the user to the presence high voltage within the unit's enclosure that may be of sufficient power to constitute a risk of electrical shock to persons. Caution: to prevent the risk of electric shock, do not attempt to open the unit. No user-serviceable parts inside. Refer all servicing to qualified service personnel.

The exclamation mark inside a triangle is intended to alert the user to the presence of important operating and maintenance instructions in the literature accompanying the appliance.

Select the installation location of your unit carefully. Avoid placing it in direct sunlight or locations subject to vibration and excessive dust. Do not use the unit where there are extremes in temperature (below 41°F / 5°C or exceeding 95°F / 35°C).

Unpacking and safety Please unpack your new product carefully. Your new product should reach you in perfect condition. Please check that no damage has occurred during transit. If any damage is found, do not operate your unit. Please contact the retailer you purchased it from immediately. If there is any damage to the mains cable do not use the device. Always disconnect the unit from the mains supply when carrying out any cleaning of the unit.

Manufacturer declarations

In compliance with the following requirements: RoHS Directive (2002/95/EU) and WEEE Directive (2002/96/EU), and Battery Directive (2006/66/EU). If this product is ever no longer functional please take it to a recycling plant for environmentally friendly disposal. Any supplied batteries can also be recycled.

CE declaration of conformity

Low Voltage Directive (2006/95/EU). The declarations are available on application from certification@lambpalc.com

Before putting the devices into operation, please observe the respective country-specific regulations.

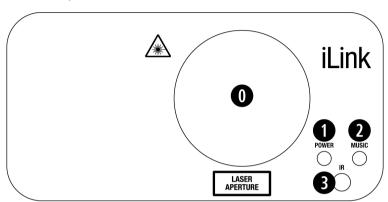

Warning

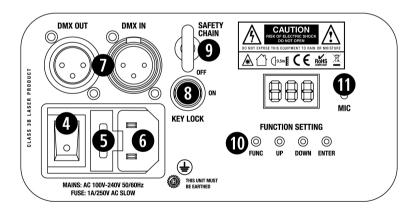

This unit contains high power laser devices. Do not open the laser housing due to potential exposure to unsafe levels of laser radiation. Please refer to the end of this manual for safe operation and installation of this device.

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorized modification to the device.

Advance written notification should be made as early as possible to appropriate federal, state, and local authorities providing show itinerary with dates and locations clearly and completely identified, and a basic description of the proposed effects including a statement of the maximum power output intended. Such notifications should be made to The Center for Devices and Radiological Health (CDRH), Office of Compliance (HFZ-342), 2098 Gaither Road, Rockville, MD 20850 and the State and local radiation control offices/agencies for all shows to be performed within their jurisdictions (a list of federal and state offices is available from the CDRH upon request).

Front and rear panels

0 Laser aperture This is the opening where laser light will appear from.

1 Power LED Indicates that the unit is switched on

2 Music LED Synchronises to any detected music/sound signal

Remote receiver
Power switch
Use to power On or Off the unit
The replaceable fuse is held here

6 Mains power Power input With IEC socket and integrated fuse holder

7 DMX In/Out 3 pin male/female XLR connector

8 **Key switch** Insert the supplied safety key before being able to turn the laser On or Off

9 Safety eyelet Used to attach a safety cable/chain when the unit is rigged

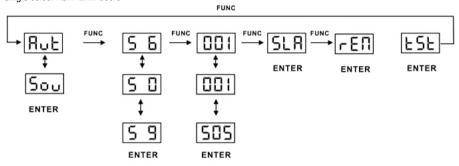

10 Control panel LED display and operation control buttons
12 Microphone Used to detect the music/sound signal

Control and function

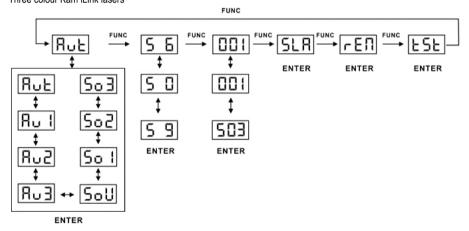

Regular breaks during operation are essential to maximise the life of this device as it is not designed for continual use. Always unplug the unit when it is not being used for long periods or before servicing. In the event of serious operation problems, stop using the unit and contact your dealer immediately. Note: The unit will emit laser light five seconds after it is powered on.

Operation (via control buttons on rear of unit)

Single colour Kam iLink lasers

Three colour Kam iLink lasers

Auto Show / Stand Alone mode (Aut)

- 1 Press the function button (**Func**) to enter **Mode** options
- 2 Press the function button until the LED panel shows Aut
- 3 Press the Enter button to confirm the setting

The laser will now be working in Auto Show / Stand Alone mode

Sound Activated / Sound-to-Light / Stand Alone mode (Sou)

- 1 Press the function button (Func) to enter Mode options
- 2 Press the function button until the LED panel shows **Sou**
- 3 Press the Enter button to confirm the setting

The laser will now be working in Sound Activated / Sound-to-Light / Stand Alone mode

Sound-to-Light / microphone sensitivity setting

- Press the function button (Func) to enter Mode options
- Press the function button until the LED panel shows \$ 6
- Press the **Up or Down** buttons to adjust the microphone sensitivity
- S 1 = low sensitivity / S 9 = high sensitivity / S 0 = mic is turned off
- 5 Press the Enter button to confirm the setting

DMX mode

- Press the function button (Func) to enter Mode options
- Press the function button until the LED panel shows 001
- Press the Enter button to confirm the setting or change the address using the Up and Down buttons
- Press the Enter button to confirm the setting

The laser will now be working in DMX mode

DMX mode / DMX address setting

- Ensure the unit is in DMX mode (see above)
- 2 Press the **Up or Down** buttons to adjust the DMX address
- Press the Enter button to confirm the setting

If multiple connected units are to be controlled in exactly the same way, set all units to the same starting address (e.g. **001**). If individual control of multiple connected units is required, each unit must have its own starting address. This address must be at least 10 channels apart e.g. set the first unit to 001 and the second unit to 011, the third unit to **021** and so on. The DMX controller will now control all the connected units separately.

Master/Slave mode

- Press the function button (Func) to enter Mode options
- Press the function button until the LED panel shows SLA
- Press the Enter button to confirm the setting

The laser will now be working in Slave mode

To create a Master/Slave chain of units, one laser has to be designated as the Master unit whilst the remaining units have to be set as Slave units. To set the Master unit, choose one laser and set it to your desired mode (Auto mode, Sound-to-Light mode, etc). Next connect all other units via DMX cables. To achieve this, join the DMX output of one unit to the next unit's DMX input until all lasers are connected. Set all the Slave units to Slave mode (see above). The Slave lasers will now duplicate the actions of the Master unit.

Operation (via IR remote control unit)

Remote Control mode

- Press the function button (Func) on the rear of the laser to enter Mode options
- Press the function button until the LED panel shows rEN
- Press the Enter button to confirm the setting

The laser will now be working in Remote Control mode

To set the laser to Remote Control mode via the IR remote control unit, press the On/Off button (red button A) for two seconds whilst the laser in any mode (except rEN or SLA modes).

On/Off button Press button to turn laser On or Off В Music mode Press button to activate Sound-to-Light mode To set adjust the mic sensitivity, press Music and B buttons Use the 0-9 digit buttons to increase or decrease sensitivity C Auto mode Press button to activate Auto mode

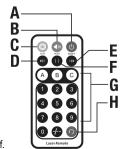

D/F Colour buttons Press buttons to cycle through laser's available colours

Pause button Press button to pause the laser effect

Pattern buttons Press the **A** and **C** buttons to change the laser patterns Use the **0-9** digit buttons to choose any pattern from 1 to 48

Pattern repeat Press button to cycle repeat the last and current patterns

Any control or setting in Remote Mode will be saved in RAM, until the unit is turned off.

DMX protocol for one colour lasers

Channel	Value	Function			
	000-063	Laser black out			
Channel 1 - mode	064-127	Auto show			
	128-191	Sound activated show (music)			
	192-255	DMX mode (other channels activated)			
Channel 2 - patterns	000-255	32 patterns as shown in pattern list (see below)			
	000-127	100%-5% size			
Channel 3 - zooming	128-169	Zooming in			
	170-209	Zooming out			
	210-255	Zooming in and out			
	000-127	0-359 degree fixed Y axis rolled			
Channel 4 – Y axis rolling	128-191	Clockwise rolling	<u> </u>		
	192-255	Anticlockwise rolling	T		
Channel 5 – X axis rolling	000-127	0-359 degree fixed X axis rolled	2		
	128-191	Clockwise rolling			
	192-255	Anticlockwise rolling			
Channel 6 – Z axis rotating	000-127	0-359 degree fixed Z axis rotate	_		
	128-191	Clockwise rotating			
	192-255	Anticlockwise rotating	$\overline{}$		
Channel 7 – X axis rotating	000-127	128 different fixed position on X			
	128-191	Clockwise moving			
	192-255	Anticlockwise moving	` _		
Channel 8 – Y axis moving	000-127	128 different fixed position on Y			
	128-191	Clockwise moving			
	192-255	Anticlockwise moving	Ψ		

DMX protocol for multi colour lasers

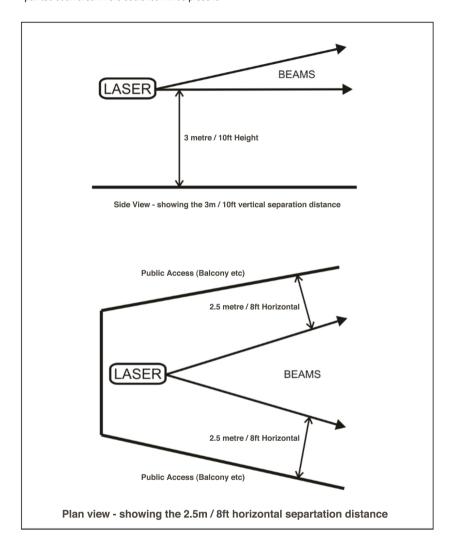

Channel	Value	Function			
	000-029	Automatic show with original preprogrammed colour			
Channel 1 - mode	030-059	Auto show with colour 1			
	060-089	Auto show with colour 2			
	090-119	Auto show with colour 3			
	120-149	Sound activated show with original preprogrammed colour			
	150-179	Sound activated show with colour 1			
	180-209	Sound activated show with colour 2			
	210-239	Sound activated show with colour 3			
	240-255	DMX mode			
Channel 2 - patterns	000-255	32 patterns as shown in pattern list (see below)			
	000-024	Blackout			
	025-049	Original preprogrammed colour			
	050-074	Colour 1			
	075-099	Colour 2			
Channel 3 - colour	100-124	Colour 3			
Charmer 5 - Colour	125-149	Alternate colour 1 and colour 2			
	150-174	Alternate colour 2 and colour 3			
	175-199	Alternate colour 1 and colour 3			
	200-224	Alternate colour 1, colour 2 and colour 3			
	225-255	Colour rolling			
Channel 4 – colour speed	000-004	Stop			
Charmer 4 – colour speed	005-255	Slow > fast			
	000-127	100%-5% size			
Channel 5 - zooming	128-169	Zooming in			
Charmer 3 - 200ming	170-209	Zooming out			
	210-255	Zooming in and out			
	000-127	128 different fixed position on X			
Channel 6 – X axis moving	128-191	Clockwise moving			
	192-255	Anticlockwise moving	<u>←</u>		
	000-127	128 different fixed position on Y	on Y		
Channel 7 – Y axis moving	128-191	Clockwise moving			
	192-255	Anticlockwise moving			
Channel 8 – Y axis rolling	000-127	0-359 degree fixed Y axis rolling			
	128-191	Clockwise rolling			
	192-255	Anticlockwise rolling	T		
Channel 9 – X axis rolling	000-127	0-359 degree fixed X axis rolling	4 5		
	128-191	Clockwise rolling			
	192-255	Anticlockwise rolling			
	000-127	0-359 degree fixed Z axis rotating	2		
Channel 10 – Z axis rotating	128-191	Clockwise rotating			
	192-255	Anticlockwise rotating

For safe operation of the iLink laser series

Please adhere to the distances shown in the diagram below. It is not reccommended that the laser is pointed at an area where audience will be present.

Caution

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Safety warning stickers

The yellow and black safety stickers that are attached to the laser unit are warnings that need to be adhered to.

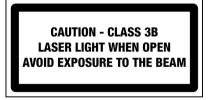

The above sticker is placed next the laser aperture on the front of the unit. Never look directly into the laser unit's aperture.

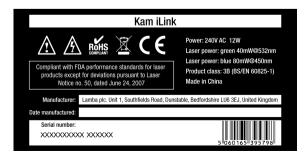

The above triangular sticker is placed on the front of the unit to indicate the presence of a laser.

The above sticker is placed on the top/front of the unit and indicates that the unit is a Class 3B laser product.

The above sticker is placed on the top/rear of the unit to indicate that if the chassis is opened, exposure to Class 3B laser light can occur.

This sticker is placed on the bottom of the unit and gives further technical information including the laser power.

Specifications

Kam iLink Blue 500 450mW blue

Kam iLink RGY
Kam iLink RBP
100mW red / 40mW green colour mixed to yellow
100mW red / 80mW blue colour mixed to pink
100mW green / 80mW blue colour mixed to cyan

Mains input/total power AC100-240V, 50/60Hz / 12w

Fuse 250V 1A slow blow (20mm glass)

Sound control Internal microphone
Laser classification Class 3B
Laser safety standard EN60825-1: 2007

Laser safety standard EN60825
Working temperature 10~40°C

DMX connections 3 pin XLR male and female

DMX channels 8 (single colour iLink lasers) / 10 (multi colour iLink lasers)

Dimensions (WxHxD) 165 x 80 x 145mm / 6.5 x 3.15 x 5.7 inches (main unit not inc hanging bracket)

Nett weight 1.5Kg

Red laser medium
Green laser medium
Blue laser medium
Beam diameter
Pulse data

LD GaAlAs 650nm, typical
DPSS Nd:YVO4, 532nm
LD GeAs 450nm, typical
<5mm at aperture
All pulses > 4Hz (<0.25sec)

Divergence (each beam) <2 mrad

Divergence (total light) <90 degrees
