U.S.-designed Paramount series acoustic instruments are finely crafted and specially voiced to bring your artistic vision to life. Each all-solid guitar offers many legacy design elements of classic '60s models, including special checkerboard binding and rosettes, unique pickguard shape, and abalone and mother-of-pearl "Concert Tone" fretboard inlays. And even with this art deco look, Paramount instruments still retain their footing in modern design. All-new Fender- and Fishman®-designed PM preamp systems are equipped with specially voiced for each body shape in the series, ensuring complete tonal control and variation.

Available in a vintage-inspired natural tinted finish, the Paramount Standard Dreadnought features not only thoughtful vintage appointments, but also the craftsmanship of a truly high-performing instrument. Crafted from premium all-solid tone woods such as mahogany back and sides and grade "A" Sitka spruce top and equipped with quartersawn scalloped "X" bracing, the Standard dreadnought is designed with freely vibrating, resonant tone in mind. It also features a fast-playing "C"-shaped mahogany neck with rosewood fingerboard, both of which are designed to accommodate the most demanding playing styles.
