- Runs on 9 V battery or the BEHRINGER PSU-SB DC power supply (not included)
- First-class electronic On/Off switch for highest signal integrity in bypass mode
- 3-Year Warranty Program\*
- Conceived and designed by BEHRINGER Germany

You wouldn't think of using anything less than best reverb you could get – in the studio! So why would you even consider using anything less at your live gig? Now you can add the rich, warm sound of studio-grade reverb to any occasion with the mind-blowing DIGITAL REVERB DR600. The DR600 always provides the ideal finishing touch to any great recording or live performance.

## What Is Reverb?

Reverb emulates the natural echo that occurs because of an environment's acoustic reflections. Think of how your guitar would sound if you plucked a note, while standing in a big empty gymnasium. Your sound would come back from all around you, at differing arrival times, due to being reflected off multiple surfaces. The DR600 can produce that same sound, even if you're playing in your loft apartment or bedroom!

\*Warranty details can be found at [music-group.com](http://music-group.com).

## Six Pack

Choose from the DR600's six stunning 24-bit, high-resolution reverbs including Spring, Plate, Hall, Gate, Room and Modulate. With its dual output jacks, the DR600's immaculate and luscious stereo enhancement will capture your audience like never before.

## Ease of Use

Just select the reverb type with the Mode control, and then dial in the Level, Tone and Time. It just doesn't get any easier than this. The status LED tells you when the DR600 is activated, and the top-quality on/off switch maintains incredible signal integrity when in bypass mode. You can power the DR600 with a 9 V battery or our PSU-SB DC power supply (not included).
