REVERB MACHINE RV600

Ultimate Reverb Modeling Effects Pedal

- The ultimate Reverb Modeler that delivers the whole history from classic spring reverbs to high-end studio reverbs—at the touch of a footswitch
- Real Sound Modeling (RSM) combines state-of-the-art DSP technology with sophisticated algorithms to emulate real acoustic environments
- Experience any reverbs from Spring, Plate, Room, Hall, Ducking, Echo to Space sounds that you have never heard before
- Dedicated Mix, Decay, Time, Type, Tone and Trails controls for awesome sound shaping
- Status LED for effect on/off and battery check
- Runs on 9 V battery or the BEHRINGER PSU-SB DC power supply (not included)
- First-class electronic On/Off switch for highest signal integrity in bypass mode
- 3-Year Warranty Program*
- Conceived and designed by BEHRINGER Germany

From sopping-wet spring reverb to state-of-the-art echo, the complete evolution of this timeless, haunting effect awaits you in the REVERB MACHINE RV600. Dedicated Mix, Decay, Time, Type, Tone and Trails controls ensure your tone won't just fade away – it will be etched in your audience's memory!

What Is Reverb?

Reverb emulates the natural echo that occurs because of an environment's acoustic reflections. Think of how your guitar would sound if you plucked a note, while standing in a big empty gymnasium. Your sound would come back from all around you, at differing arrival times, due to being reflected off multiple surfaces. The RV600 can produce that same sound, even if you're playing in your loft apartment or bedroom!

REVERB MACHINE RV600

Ultimate Reverb Modeling Effects Pedal

RSM – Superior Sound

The RV600 contains BEHRINGER's Real Sound Modeling (RSM) processor and DSP technology, giving it the incredible power to make your guitar sound like you're playing in a cave, a cathedral, or even the outer reaches of the cosmos. With the RV600, putting studio-caliber reverb into your signal chain is easier than ever before.

It's Simple!

Just twist the dedicated dial to select dead-on modeling of Ducking, Space, Cave, Tile, Echo, vintage '63 Spring, Spring, Plate, Room, Chamber and Hall reverbs. Tweak the dedicated Mix, Decay, Time and Tone controls along with the Trails On/Off switch to create reverb that is resonant, abrupt, or just plain otherworldly! The status LED tells you when it's working, while the top-quality on/off switch preserves your signal's integrity in bypass mode. You can power the incredible RV600 with a 9 V battery or our PSU-SB DC power supply (not included).
