	K.2 Series Preset simulation	System check, offering direct download of updates when the mixer is connected to the Internet.	More...

On June 6, QSC will be introducing TouchMix V3.0 for TouchMix-8 & 16.

Version 3.0 includes twenty significant enhancements, making these models far and away the most powerful and comprehensive, yet easy-to-use compact mixers available.

Many features previously available exclusively on the TouchMix-30 Pro will be implemented with the TM 8/16 3.0 software release.
