

AEROPHONE EDITOR iOS & ANDROID APP

Customize Your Aerophone for Maximum Expression

The Aerophone Editor is a free iOS and Android app for the Aerophone AE-10 that lets you adjust tones, set various playing parameters, and organize tone lists. You're able to deeply customize sounds and functions with parameters only available in the app, and easily create tone lists for different performance and practice situations. Via a convenient interface, you have access to four tone layers, various controller assignments, effects settings, and more.

The Aerophone Editor is a must-have tool to perfectly tailor your Aerophone AE-10 for your own personal playing style.

- Create personalized sounds with up to four layered tones
- Build tone lists to fit various playing situations
- Extensive tone editing parameters, including many not available on the instrument itself
- Customize breath, bite, and thumb control assignments
- Comprehensive effects editing
- Requires AE-10 System Version 2.10 or later
- Apple USB camera adapter required for communication between an iOS device and the Aerophone AE-10
