Drive

LIKE BUTTER & LIGHTNING!

The Way Huge Drive is simply named with a simple three-knob control setup. But on the inside of this pedal is a custom circuit that creates potent, versatile overdrive and distortion tones that can be moved and shaped by the intensity of your attack and the volume of your guitar. At low Drive settings, you'll get a warm, buttery sound with a bit of velvet around the edges. Midways gets you thick, tubey overdrive. Start cranking that Drive knob towards the end of the range, and you'll have gnarly thunder and lightning distortion. Use the Tone knob to brighten it up or mellow it out, and use the Volume knob to be as loud as you wanna be. This pedal is limited to 500 units and comes with picks and a pick tin featuring custom artwork.

External Controls

- 1** VOLUME sets output level
- 2** DRIVE unleashes copious amounts of overdrive and fuzz gain
- 3** TONE adjusts from warm to bright
- 4** FOOTSWITCH toggles the effect on/bypass (Blue LED indicates effect is on)

POWER

The Way Huge Drive is powered by a single 9-volt battery, a 9-volt AC adapter such as the Dunlop ECB003, or the DC Brick™ and Iso-Brick™ power supplies. The power input is a 5.5mm x 2.1mm jack with the positive voltage on the outer sleeve. Using an external power supply will disconnect the battery. Disconnect the input jack to preserve battery life when not in use. The pedal will lock into bypass mode when it is time to change the battery. It also includes power protection circuitry to prevent damage from AC power supplies.

Specifications

Input Impedance	> 42 k Ω
Output Impedance	< 50 k Ω
Noise Floor	-80 dBV
Bypass	True Hardwire Relay
Dimensions	5" x 3-1/4" x 2-1/2"
Weight	12.2 oz
Current Draw	1.8 mA
Power Supply	9 volts DC

All measurements made at 1 kHz, with controls at mid-position.
