THE ROCK LEGEND IS BACK

The legendary Roland AX-Synth, loved by musicians all over the world, is now available in black sparkle. Rule the show with this awesome synth!

PROFESSIONAL SHOULDER SYNTHESIZER

It's time to escape from behind the keyboard rig and rock the stage! The stylish AX-Synth represents Roland's new generation of shoulder keyboards but, for the first time, this one has a sound generator onboard. It's totally self-contained and equipped with powerful, solo-orientated sounds from Roland's latest synths. So, strap on an AX and step into the limelight!

ALL IN ONE

Plug in and play – what could be more convenient?

The AX-Synth has everything you need to steal the show.

Unlike most shoulder synths of yesteryear, the AX-Synth is self-contained and loaded with 256 tones - perfect for blistering solos! No external MIDI devices are required - everything is built-in and ready to go.

- Built-in sound engine with voices from Roland's latest synthesizers
- **SuperNATURAL** sounds included
- Realtime controllers: ribbon controller, D Beam, modulation bar, knobs and easily visible display
- Long battery operation (approx. 6 hours)
- USB MIDI for easy connection to PC
- Cool and stylish design

CONTROL FREAK

The AX-Synth is packed with cool controllers for expressive live performance.

Glide your fingers over the Ribbon Controller for ultra-smooth pitch bends. A Modulation Bar and dedicated control knobs are also provided for real-time sound shaping. Wave your hand over the invisible D Beam for attention-grabbing effects.

USB MIDI

Whilst the AX-Synth is completely self-contained, it's also capable of driving external instruments via MIDI. Plug it into a MIDI device, and enjoy an unlimited world of sounds and textures, all controllable from the AX-Synth.

DEDICATED EDITOR SOFTWARE

The AX-Synth has a vault of great solo sounds onboard, but if you want to customise your sounds, you can easily do so with the dedicated PC software editor/librarian application. The AX-Synth's USB/MIDI connector makes communication to and from your computer fast and convenient.
