MODE MACHINES SP-1

The SP-1 belongs to the manufacturer MODE MACHINES and is a universal sustain pedal. The pedal design is held in a matte black. The pedal itself is shiny, silvery. At the top it carries the MODE MACHINES logo. The switch on the right side is clearly visible. Four knob feet ensure a stable use of the pedal and protect the SP-1 against slipping. To connect the SP-1, a jack-type angle plug has been selected.
