

MODE MACHINES MM-3

The MM-3 of the german manufacturer MODE MACHINES is a guitar/bass-effect pedal with a main focus on classic fuzz sound. With the built in knobs you can not only choose between "Bass BUZZ" which sounds like the old germanium transistor Fuzz Face and the more trebly fuzz "Treble Bite". A dry blend function as well as the option to change infinitely variable from an overdrive effect to a fuzz effect rounds off the scope.
