

WHD

Take note of the direction of the hinges in the above diagram, Step 1 and 3 are facing the same way, as are Steps 2 and 4. This is to ensure the WHD Drum Shield can be folded flat for easy storage and transportation.

Remove the protective paper from each panel before assembly, take care during installation not to scratch the panels.

Using a hard block to take the impact of the hammer will ensure the hinges don't break during installation.

Using some lubricating fluid (not included) is advised to make the process easier, take your time when assembling this unit.
