| Weight | 131 g |
| Accessory | soft case |

DESCRIPTION

The DTX 350 m headphone features a foldable design making it an ideal companion when being out and about. It is fitted with an angled, 3-pole, gold-plated stereo jack plug to connect to all players with a mini stereo jack socket (3.5 mm) such as laptops, tablet computers, MP3 players or smartphones.

With the remote control and hands-free microphone integrated in the cable phone calls can be answered and ended. Depending on the software of the mobile phone or player (e.g. MP3 player), the remote control can be used to control other functions such as the music playback.

The closed design of the headphone effectively attenuates ambient noise so that its powerful bass and detailed highs are heard excellently even in noisy surroundings. Therefore, it is a good choice for each mobile music lover who wants to enjoy his/her favourite music anywhere.

The flat cables do not tangle up and therefore allow an easy handling of the headphone. If the headphone is not in use, it can be folded and stored in the supplied soft case.
