Mobile Devices

Don't Mess Around

GO VOCAL's mic preamp ensures broad dynamic range for a distortion-free audio signal that far exceeds the quality of your device's internal microphone. The XLR input lets you connect handheld dynamic and even studio-grade condenser mics that require 48 V phantom power for operation.

APP-ly Some Effects

When it comes to sparking your creativity, TC Helicon has you covered with an extensive array of mobile applications designed specifically for your GO VOCAL device, including effects, processing and much more – plus they are all free to download from tchelicon.com! And if that's not enough, GO VOCAL is also compatible with a wide range of apps and software from 3rd-party vendors.

Can You Hear Yourself?!

Just connect some headphones to your GO VOCAL and hear yourself as you record with absolutely zero latency. An LED is provided to indicate the status of phantom power, and also serves as an easy visual reference when setting your microphone's optimal gain level.
