

DIGITAL SIGNAL PROCESSING (DSP) PRESETS

The L410X includes built-in presets, so you get the optimum sound for your venue. The advanced Digital Signal Processing (DSP) gives you clarity to suit speech, brightness to suit music, and bass boost for parties.

Each of the five presets have been carefully fine-tuned by professional audio engineers and are easily selected at the touch of a button. We've taken care of the technology, so you can concentrate on making your event the best it can be.

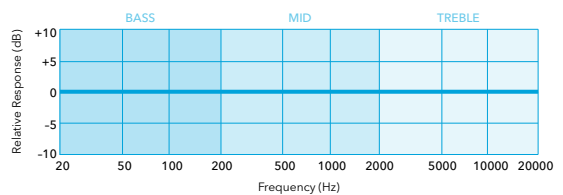

FLAT

Completely neutral. No DSP processing is applied, so you hear everything exactly as it is.

Examples:

- Using an external audio mixer
- Critical listening in situations where you need to hear unprocessed sound

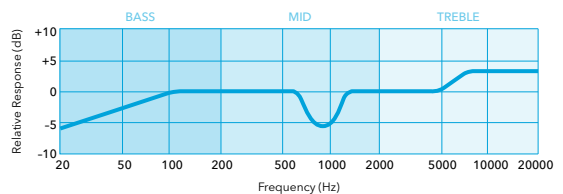

SPEECH

A crisp and clear sound, which aids clarity in presentations and other speech situations.

Examples:

- Presentations in office and classroom environments
- For a public announcement system at an event
- Awards and dinner events
- Amplifying drama and theatre on small stages

MUSIC

Designed to give energy and brightness to pre-recorded music.

Examples:

- House and garden parties
- Casual listening
- Fitness classes

LIVE

Cut through audiences for a pronounced sound, with a slight low-end boost to add 3D depth.

Examples:

- Live gigs, rehearsals and other musical performances
- Singer-songwriters
- Open mic nights

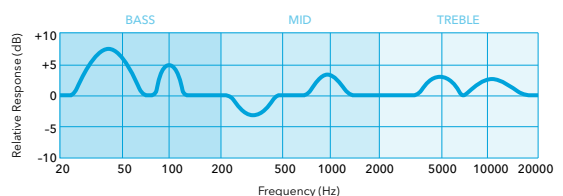

CLUB

Boosts the bass to help drive dance music and enhance your party's atmosphere. Ideal for larger venues.

Examples:

- Mobile DJs
- Children's parties
