# INFORMATION FOR YOUR SAFETY!

## THE FCC REGULATION WARNING (for USA)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Unauthorized changes or modification to this system can void the user's authority to operate this equipment.

### CAUTION

The normal function of the product may be disturbed by Strong Electro Magnetic Interference. If so, simply reset the product to resume normal operation by following the owner's manual. In case the function could not resume, please use the product in other location.

## PRECAUTIONS

### PLEASE READ CAREFULLY BEFORE PROCEEDING

Please keep this manual in a safe place for future reference.

#### Power Supply

Please connect the designated AC adaptor to an AC outlet of the correct voltage.

Do not connect it to an AC outlet of voltage other than that for which your instrument is intended.

Unplug the AC power adaptor when not using the instrument, or during electrical storms.

#### Connections

Before connecting the instrument to other devices, turn off the power to all units. This will help prevent malfunction and / or damage to other devices.

#### Location

Do not expose the instrument to the following conditions to avoid deformation, discoloration, or more serious damage:

- Direct sunlight
- Extreme temperature or humidity
- Excessive dusty or dirty location
- Strong vibrations or shocks
- Close to magnetic fields

#### Interference with other electrical devices

Radios and televisions placed nearby may experience reception interference. Operate this unit at a suitable distance from radios and televisions.

#### Cleaning

Clean only with a soft, dry cloth. Do not use paint thinners, solvents, cleaning fluids, or chemical-impregnated wiping cloths.

#### Handling

Do not apply excessive force to the switches or controls.

Do not let paper, metallic, or other objects into the instrument. If this happens, remove the electric plug from the outlet. Then have the instrument inspected by qualified service personnel.

Disconnect all cables before moving the instrument.

# Panel Controls

## Front Panel

### 1. Volume knob

Control the volume of phone and line output. Turn it clockwise to increase the volume and anticlockwise to decrease it.

### 2. [save] button

Save current kit setting to a user kit.

### 3. [start/stop] button

Start or stop song playing.

### 4. [kit] button

Display the drum kit number or reverb setting.

### 5. [voice / volume] button

Display the voice number, volume value or pitch value.

### 6. 3-digit LED display

Display the parameters of current menu mode.

### 7. [song / volume] button

Display the song number or accompaniment volume value.

### 8. [drum off] button and indicator

This button is used to turn on or turn off the percussion of song.

### 9. Beat indicator

Beat of metronome or a song is playing

### 10. [click] button

Turn on or off the metronome.

### 11. [ + ] and [ - ] buttons

These buttons are used to change the setting number of kit, voice, song and adjust the Pad volume.

### 12. Pad select buttons and indicators

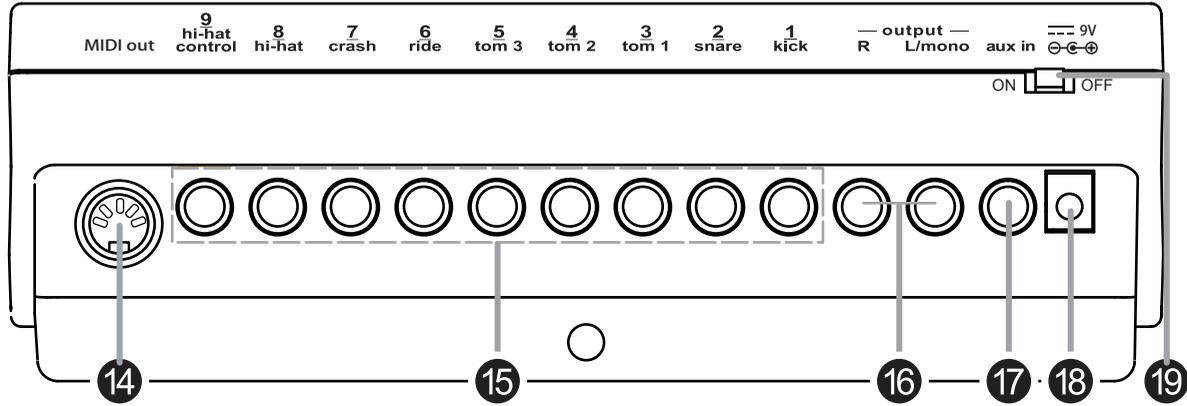

Select current pad and adjust the pad volume. When you press them, the corresponding indicator lights up.

### 13. [ tempo - / + ] buttons

Change current tempo.

# Panel Controls

## Rear Panel

**14. MIDI out jack**

Connect with external sound module.

**17. Aux.in jack**

Connect with external sound source.

**15. Trigger input jacks**

Connect with pads, cymbals, hi-hat control, kick trigger.

**18. Power supply jack ( DC in 9V)**

Connect an AC adaptor to this jack.

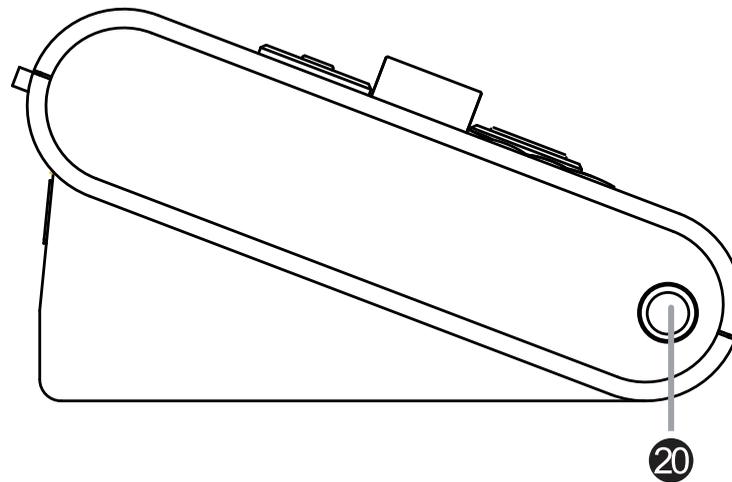

**16. Output jacks (R, L/mono)**

Connect with the amplifier or audio system. For monaural output use the L/mono jack.

**19. Power switch**

Turn the power on/off.

## Side Panel

**20. Phones jack**

Connect with to a pair of stereo headphones to this jack. (Connect the headphones will not mute the output jacks.)

# Setup

## Caution!

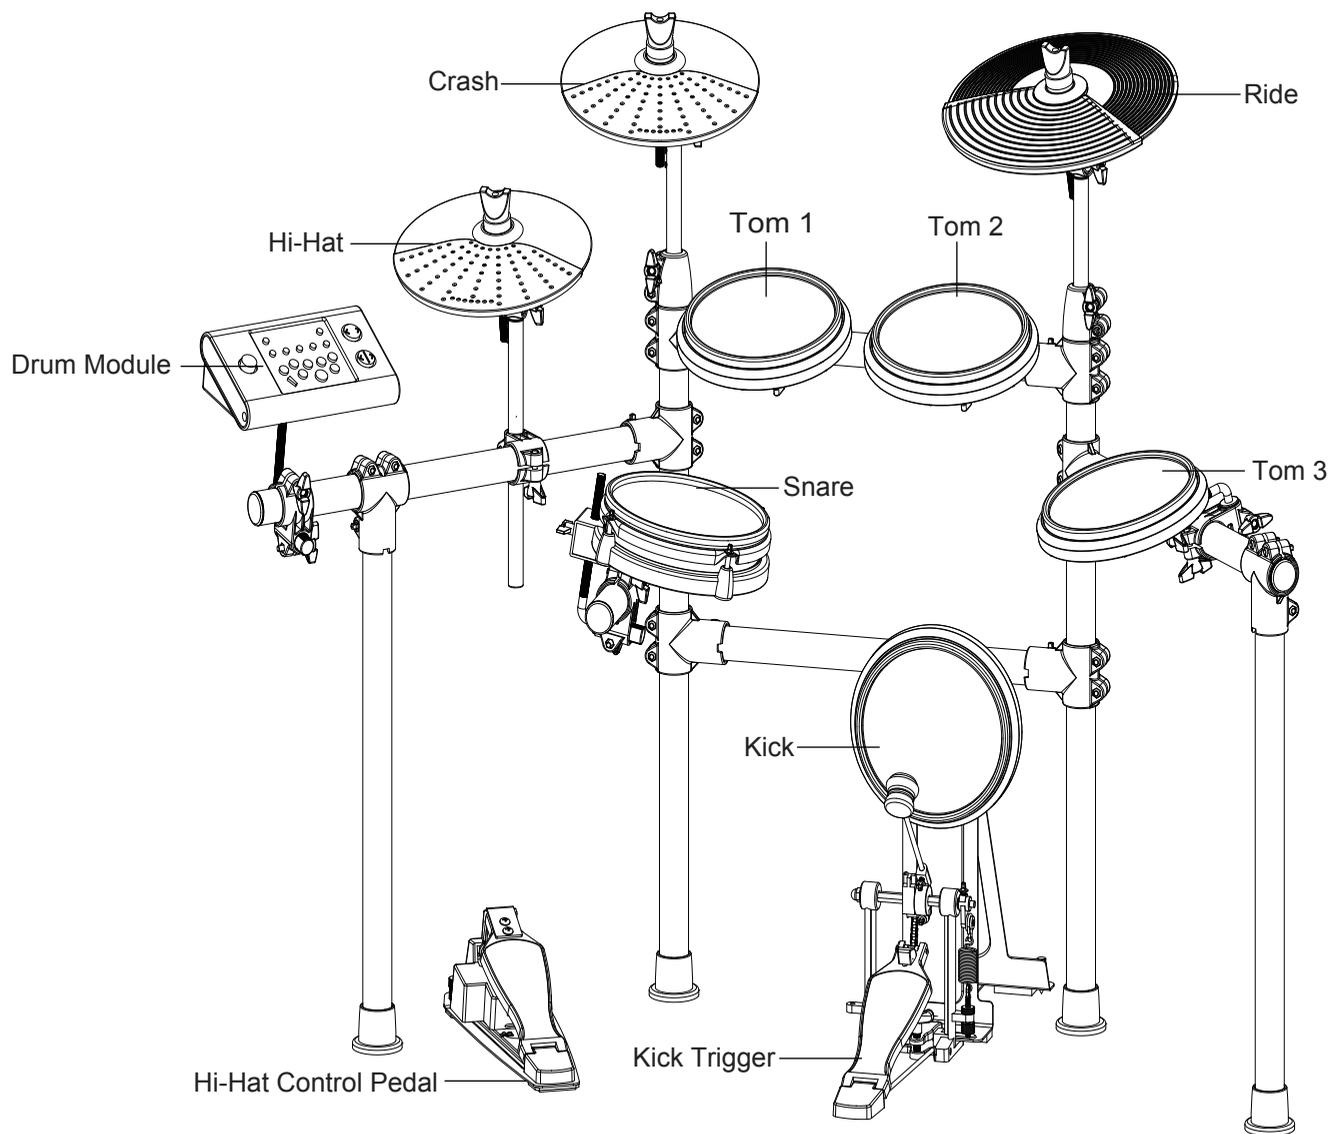

To prevent electric shock and damage to the device, make sure the power is switched OFF on the drum and all related device before making any connection.

### Connect the Pads and the Pedals

Using the provided cables, connect each Trigger input jack on the rear panel of the module, and make sure each pad is connected to its corresponding Trigger input jack.

#### Note:

1. The voice of hi-hat pad hitting is controlled by hi-hat pedal. Similar to a real drum kit, the hi-hat pad functions as an 'open hi-hat' when the pedal is stepped. When the pedal is released, it functions as a 'closed hi-hat'.
2. Choking (pinching) the cymbal's edge with the hand immediately after hitting the cymbal makes the sound stop. Both Ride and Crash cymbals have cymbal choke. But hi-hat don't have the cymbal choke. Choking the crash/ride edge with the hand immediately after hitting the crash/ride mutes the crash/ride sound.

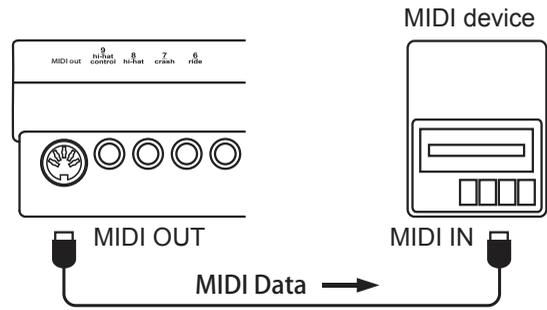

# Setup

## Connect a MIDI Device

This is for you want to use an external sound module or MIDI sequencer.

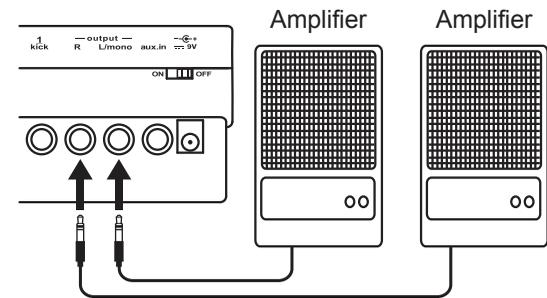

### Transmit MIDI Data

1. Use a MIDI cable to connect the MIDI OUT jack on the drum module with the MIDI IN jack on the external MIDI device.
2. This drum will output all the MIDI codes generated by pads hitting or pedal stepping via the MIDI output connector. But clicking and the MIDI codes in songs are excluded.

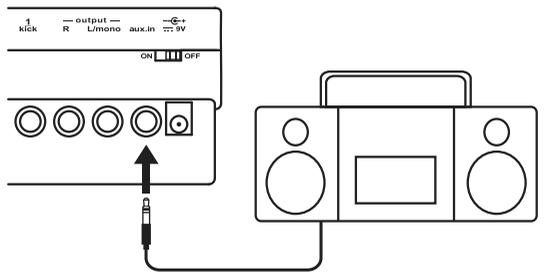

## Connect a Audio Equipment

1. When you want to listen to the voices with an amplifier, connect amplifiers with the Output L/MONO and R jacks on the rear panel. (For monaural playback, use the L/MONO jack; for stereo playback, connect both L/MONO and R jacks.)
2. The volume is adjusted with the VOLUME knob.

## Connect a CD Player, etc.(Aux. In jac

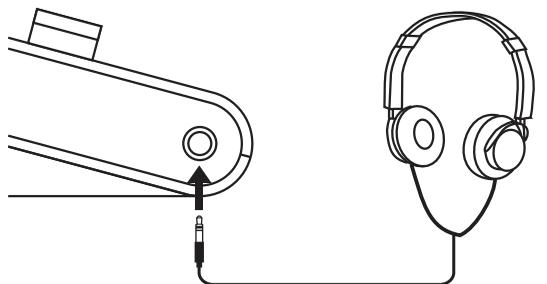

1. The audio output of a CD player, or other audio source, to connect with the AUX IN jack on the rear panel can be mixed with the sound of the drum. This function is convenient that lets you play along with a favourite song.
2. The volume of the external signal is adjusted with the VOLUME knob.

## Connect Headphones

An optional set of stereo headphones can be connected with the PHONES jack located on the side of the drum module.

\* Adjust the volume to a comfortable level.

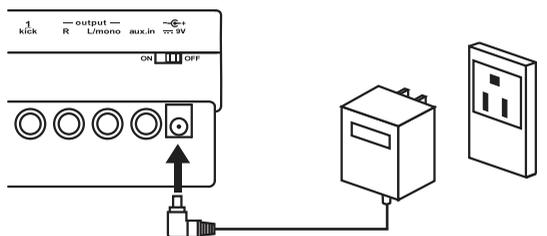

## Connect the Power Supply Jack

Make sure the power is switched OFF and connect the power adaptor with the DC IN jack on the rear panel.

### Note:

1. To protect the speakers, amplifier and the drum module from damage, rotate the volume knob to the minimum volume level before switching the power ON.
2. Make sure the power is switched OFF when connecting drum module with external devices.

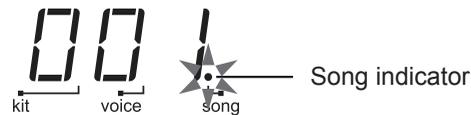

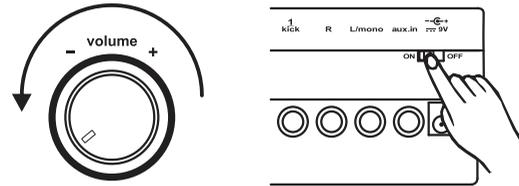

# Functions

## Switch the Power ON

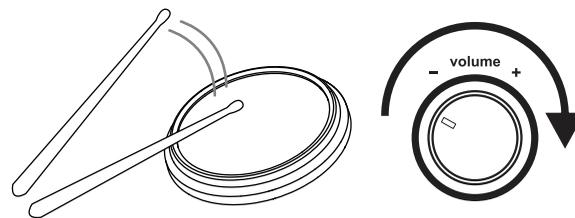

After confirming all connection have been completed, rotate the volume knob to the left ( minimum volume level) before switching the power on.

Set the power switch to "on" position to switch on the power. Display shows the song's number and its indicator lights up.

## Set the Main Volume

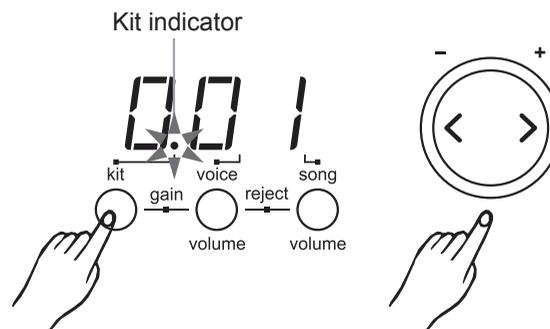

While hitting a pad, gradually rotate the volume knob until a comfortable volume level is reached.

## Select a Drum Kit

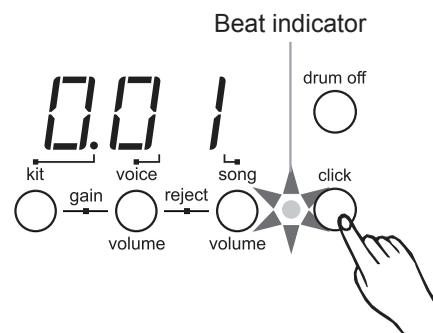

The unit comes with 35 (001-024) preset drum kits and 11 userkits (025-035).

1. Press [ kit ] button  
The current kit number appears and the Kit indicator lights.
2. Press [ + ] or [ - ] buttons to select the drum kit number (001 - 024) you want to use.

## Play with a Metronome

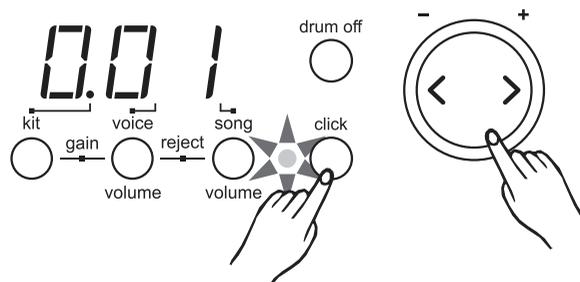

1. Press the [ click ] button to start the metronome. The beat indicator is flashing and the click sound begins to play.
2. Press the [ tempo + ] or [ tempo - ] buttons to set the metronome beat.
3. Press the [ click ] button again to stop the metronome.

## Adjust the Volume of the Click Sound

Hold down the [ click ] button and press the [ + ] or [ - ] buttons to adjust the volume of the click sound, the metronome automatically play.

\*Volume of the click sound will be reset to default once power is on.

# Play a Song

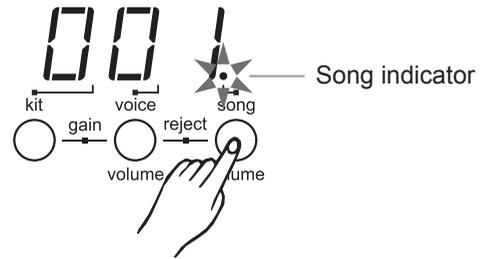

## Select a Song

This drum module has a total of 60 preset songs.

### Note:

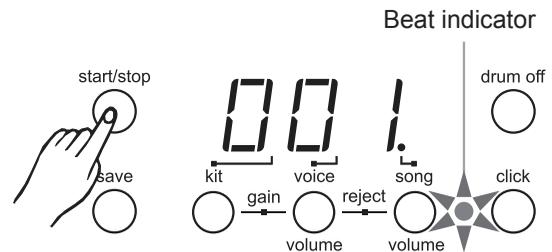

The preset song setting is 001 after you slide on power.

1. Press [ song / volume ] button.  
The song indicator lights and the current song's number appears.
2. Press [ + ] or [ - ] buttons to select one of the song and listen to it.  
Song numbers 001 - 060 are preset songs.

## Listen to the Song

1. Press [ start/stop ] button and the beat indicator is flashing.  
The song will start playback from the beginning.
  2. You can stop the song during playback by pressing the [start/stop] button.
- \* The ASSIGN pad's indicator flashes at the first beat of each measure.

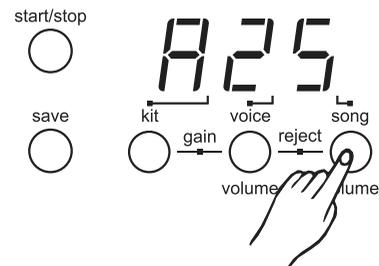

### Note:

The ASSIGN pad's indicator can be lighted off by pressing both [hi-hat control] and [kick] buttons at the same time. You can also listen to the song by hitting the crash pad when the pad pattern function is not setting off.

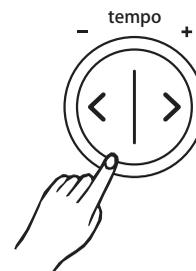

## Adjust the Song's Volume

1. Press the [ song / volume ] button to select the volume of song.  
Display shows : " A XX". (XX = level value, 00 to 31)
2. Press [ + ] or [ - ] buttons to adjust the volume of song accompaniment.

## Adjust the Song's Tempo

1. Press the [ tempo + ] or [ tempo - ] buttons. Display shows the current tempo value.
  2. Press the [ tempo + ] or [ tempo - ] buttons to increase or decrease the tempo. (tempo value in the range of 30 to 280)
- \* Holding down either a [ tempo + ] or [ tempo - ] buttons to change the setting in a high speed.  
\* Press [ tempo + ] and [ tempo - ] buttons at the same time to reset the tempo to default value.

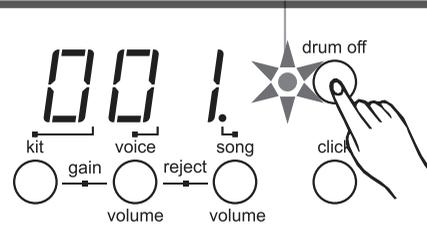

### Note:

About 2 seconds after you stop pressing the [Tempo] button, display changes to show your selected song, voice or kit number instead of tempo value.

# Play a Song

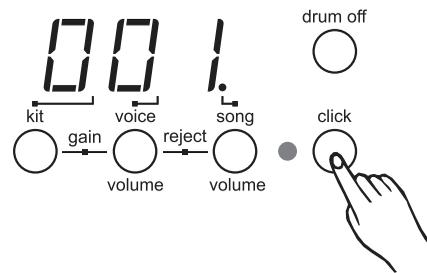

## Mute a Drum Part

1. Press [ drum off ] button. The drum off indicator lights. The drum mute function is active.
  2. Press [ start/stop ] button to playback the song. The drum part in the song will be muted.
  3. To cancel the drum mute function, press [ drum off ] button again. The drum off indicator light goes off.
- \* The drum mute function can be used during song playing.

## Play with a the Click Voice

1. Press the [ click ] button to start the metronome. It will be played with tempo.
2. Press the [ click ] button again to stop the metronome.

**Note:**

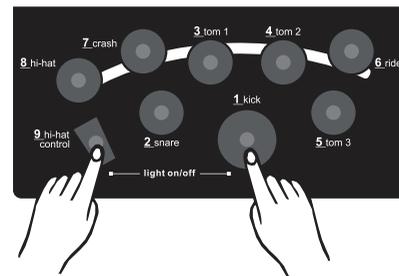

The click voice will not stop automatically once the song finished until you press the [ click ] button.

## Use the Lighting Guide Function

The lighting guide function provides you a valuable lesson to practice or learn the drum kit with playing the preset song.

1. Select the song number you want to practice.
2. Press [ drum off ] button.
3. Press [ start/stop ] button to start song play.
4. Strike the pad in accordance with the lighting of pad's indicators or press the hi-hat pedal and kick the bass drum pad exactly when their indicators light.

- \* During song playing, you can change the Tempo(speed) to set your desired tempo.
- \* Press the [ hi-hat control ] + [ kick ] buttons to turn off all the pad's indicator. Press the [ hi-hat control ] + [ kick ] buttons again to turn on all the pad's indicator.

# Create a User Drum Kit

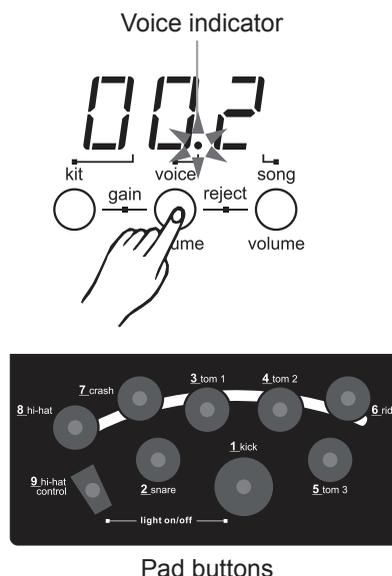

## Set a Drum Voice

The unit comes with 335 high quality percussion sounds that you can assign to any of the drum pad, 3 cymbals, hi-hat control and bass drum. This way you can create your own drum kit that consists of the voice you want. The kit number 025-035 is used for saving your own drum kit.

1. Press [ voice ] button.  
The voice indicator lights and the display shows the voice number of this pad.
2. Press [ pad ] button or hit the pad you want to set.  
The pad indicator light and display shows the current voice number of lighting pad.
3. Press [ + ] or [ - ] buttons to select the voice number you want to assign.
4. Repeat step 2 and 3 for to set the voice for another pad or bass drum.

**Note:**

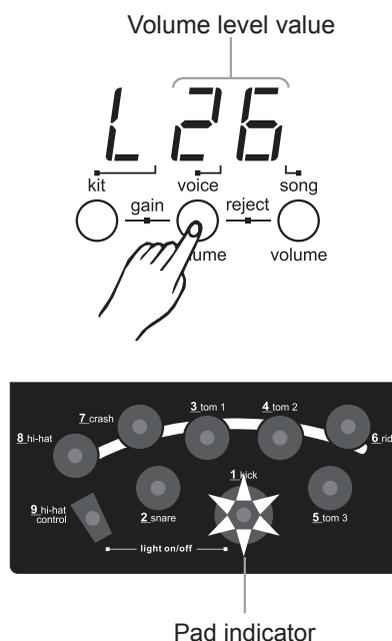

Select the snare rim only through hitting the pad.

## Adjust the Volume of Pad

This unit allows you to adjust the volume of every voices in the kit that let you control the individual level (volume) of the pads or bass drum.

1. Press the [ voice / volume ] button to select the volume level setting display shows : " L XX".  
(XX = level value, 00 to 31)  
The pad button indicator lights and display shows the current volume level of lighting pad.
2. Press the [ PAD ] button or hit the percussion pad you want to adjust.
3. Press the [ + ] or [ - ] buttons to increase or decrease the volume.  
While you are adjusting, hit the corresponding pad and listen carefully the sound level until reaching the level you want.
4. Repeat step 2 and 3 to adjust the volume of other pad voices.

## Adjust the Song Number of Pad Pattern Function

The unit allows you to adjust the song number of pad pattern function in the kit that let you set the number of playing song when hitting the crash pad.

1. Press the [voice/volume] button to select the pad pattern setting display shows "OFF" or S XX".  
(XX = level value, 1 to 60, OFF means closing this function and other option means setting the corresponding song number)
2. Press the [ + ] or [ - ] buttons to increase or decrease the song number.  
While you are adjusting, hit the crash pad and listen the song until reaching the you want song. Hit again, stop the song.

## Create a User Drum Kit

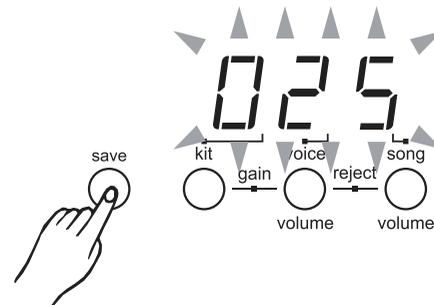

### Save Your Drum Kit Voices

Once completing to your own drum kit, you have to savethem in the unit; otherwise your drum kit will be erased whenyou turn off the unit.

1. Press [ save ] button.  
The kit number 025 appears and is flashing.
2. Press [ + ] or [ - ] buttons to set the kit number (025-035) for saving your drum kit.
3. Press [ save ] button again. The flashing kit number stops.

#### **Note:**

To cancel the save operation, press the [ voice ] button. If there is a fault, the display will show "Err".

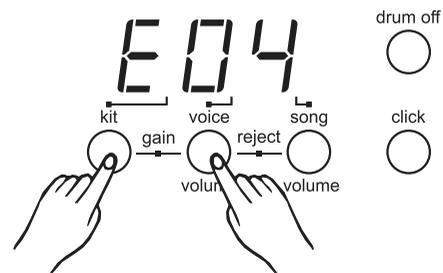

# Setting

## Adjust the Pad Sensitivity

You can adjust the sensitivity(gain) of the inputs from pads.

1. Hold down [ kit ] and press [ voice / volume ] buttons.  
Display shows: "EXX", the pad sensitivity value is indicated.  
(XX=gain level value, 00 to 15.)
2. Press [ pad ] button or hit the pad you want to set.  
The pad indicator light.
3. Press [ + ] or [ - ] buttons to adjust the sensitivity of pads.  
Range : 00-15  
Large values will produce a high sensitivity even if the pad is hit softly. Lower values will producing a low sensitivity even if the pad is hit forcefully.
4. Repeat step 2 and 3 for to set the voice for another pad or bass drum.

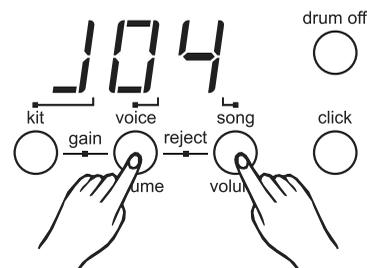

### Note:

1. After adjusting the sensitivity value, you can save them into built-in memory. In the sensitivity mode, the sensitivity value is displayed, press [save] button and the sensitivity value will be saved, and then return to previous display.
2. The drum remains untouched for 10 seconds, the LED will return to previous display.
3. If turn off the power without save, you will lose the changes you have just made.

## Set the Rejection for Each Pad

Prevents crosstalk caused by pads or drums connected to other inputs. Events triggered by other pads that are of a lower inputvalue than what is set here will not be delivered for a set lengthof time.

1. Hold down [ voice / volume ] and press [ song / volume ] buttons.  
Display shows: "JXX", the rejection value is indicated.  
(XX=rejection level value, 00 to 15.)
2. Press [ pad ] button or hit the pad you want to set.  
The pad indicator light.
3. Press [ + ] or [ - ] buttons to adjust the sensitivity of pads.  
Range : 00(no rejection)-15
4. Repeat step 2 and 3 for to set the voice for another pad or bass drum.

### Note:

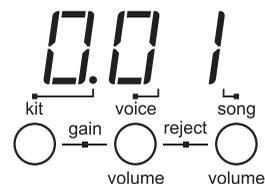

1. After adjusting the rejection value, you can save them into built-in memory. In the rejection mode, the rejection value is displayed, press [save] button and the rejection value will be saved, and then return to previous display.
2. The drum remains untouched for 10 seconds, the LED will return to previous display.
3. If turn off the power without save, you will lose the changes you have just made.

# Setting

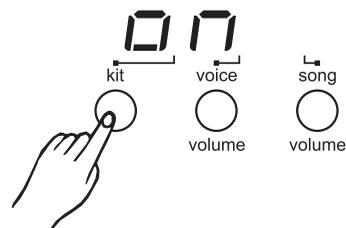

## Reverb

This function sets the reverb effect of the drum.

1. In " kit mode", press the [ kit ] button, display shows the current reverb setting.

2. Press [ + ] or [ - ] buttons to turn on or turn off the reverb.

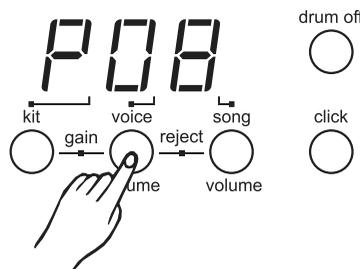

## Tuning

This function sets the pitch of each drum pad voice.

1. Press the [ voice / volume ] button to select the pitch setting display shows : " P XX". (XX = value, 00 to 15)

The pad button indicator lights and display shows the current pitch setting of lighting pad.

2. Press the [ PAD ] button or kit the percussion pad you want to adjust.

3. Press the [ + ] or [ - ] buttons to set the pitch you want.

4. Repeat step 2 and 3 to set the pitch of other pad voice.

## Factory Reset

This drum module will reset its to initial settings. Beware all the data will be lost.

1. Turn the power off.

2. Turn on the power while holding the [ tempo - ] and [ tempo + ] buttons.

## ERP Function Instruction/ERP

In order to save energy, we have designed the "Automatic shutdown" function for the drum module. With this function, the drum module will shutdown automatically when you have left it idle for more than 30 (default) minutes.

If you don't need this feature, just press and hold the [START/STOP] button then turn the drum module on. You will also see the 3-digit-LED temporarily displaying "PoF" for 3 seconds before entering the main menu which indicates that the "Automatic shutdown" function is turned off.

# Making the Settings for MIDI

## About MIDI

MIDI (Musical Instrument Digital Interface) is a standard that allows performance data and other information to be exchanged among electronic musical instruments and computers.

## MIDI Connection

MIDI OUT: This terminal transmits data from the digital drum to other MIDI devices.

## Connecting with an External Sound Device

The digital drum transmission channel for the drum kit is fixed to Channel 10. It will output MIDI data generated by the triggers when hitting the pads or stepping on the Hi-Hat control pedal (Note ON/OFF, and Foot messages). Song playback data and metronome notes are not transmitted.

## MIDI Note Number to be Transmitted/Received by Each Pad

Each drum kit can have it's own set of MIDI note to be transmitted/received by each pad, useful for advanced purpose.

Trigger	MIDI Note	Trigger	MIDI Note	Trigger	MIDI Note	Trigger	MIDI Note
Kick	36	Tom1	48	Ride	51	Hi-hat C	42
Snare	38	Tom2	45	Crash	49	Hi-hat P	44
Snare rim	40	Tom3	43	Hi-hat O	46	Splash	21

## Note:

For more information on received MIDI messages, refer to MIDI implementation chart.

# Specifications

## Drum Pad:

4 drum pads , 3 cymbal pads ,1 hi-hat control pedal , 1 kick trigger

## Voices:

335voices

## Drum Kits:

24 preset kits, 11 user kits

## Song:

60 preset songs

## Controls:

POWER SWITCH, START/STOP, SAVE, KIT, VOICE/VOLUME, SONG/VOLUME, DRUM OFF, CLICK, HI-HAT, CRASH, RIDE, HI-HAT CONTROL, SNARE, TOM 1, TOM 2, TOM3, KICK, VOLUME, + / -, TEMPO + / -

## Display:
