

DIGITAL STAGE PIANOS

SDP-1**SDP-2**

The SDP-2 Stage Piano is a compact and lightweight piano suitable for stage and home use. Featuring 88 touch sensitive weighted keys, eight realistic voices and 4 integrated speakers, the SDP-2 is a popular choice for keyboardists and piano players. The keyboard includes a sustain pedal, power supply and music rest, so you have everything you need to get playing straight away.

SDP-3

The SDP-3 Stage Piano is a perfect instrument for home and performance use for all pianists. The piano features 88 hammer action keys with three levels of touch sensitivity, combined with 16 high quality tones including piano, organ and strings, which can be played through the internal speakers or the line output to connect to an amp or PA, or to a computer via the USB Audio output. The piano includes a host of effects including reverb and chorus.

SDP-4

The SDP-4 Stage Piano is lightweight and portable. Featuring 88 hammer action keys and 20 dynamic voices, it is the ideal choice for performing musicians. MIDI connectivity enables pianists to make use of the SDP-4 as a MIDI controller at home as well as on stage. This makes home recordings and sequencing far more accessible for pianists wanting to capture a more realised performance with the capability of editing.
