

VISIONKEY-10

The VISIONKEY-10 is the perfect entry level keyboard for any budding pianist. Comprised of 61 touch sensitive keys and a wide range of sounds, this keyboard provides you with a great head start to becoming the best player you can be. At the heart of the VISION-KEY10 lies a handy LED screen, this grants you immediate access to all parameters to ensure you can focus on improving your ability without worrying about technology holding you back. The inclusion of two 3W speakers allows you to project your sound, whilst the headphone jack allows you to progress in silence at a rate that's comfortable to you.

VISIONKEY-20

The VISION KEY-20 is an excellent choice for intermediate players. Thanks to the inclusion of 653 authentic sounds and realistic rhythms you'll be able to achieve a real variety of sounds to suit any musical style. This, when merged with 128 note polyphony, allows you to fully voice any chord, no matter how complex it may be. Enrich your sound with integrated DSP effects, these provide the perfect finishing touch for record ready results from the get-go. The Intelligent Learning System allows you to perfect your technique with a wide range of monitored exercises to ensure technical proficiency.

VISIONKEY-30

The VISION KEY-30 is the centre piece of the VISION range. This keyboard comes complete with a wide range of sounds and features that will benefit any player, regardless of their experience and technical ability. Project your sound loud and clear, without the need of a PA via the integrated 2 x 35W speakers. That's 50W more power than the -20! Make the most of the 618 sounds on offer to you thanks to Split mode. This allows to perform two sounds simultaneously, eliminating the need for additional keyboards. Thanks to USB connectivity, the keyboard doubles up as a MIDI controller, providing full integration into your DAW.
