

# DIGITAL DRUM KITS

COMPARISON CHART

### JDD200

The JDD200 is a high-quality instrument for young beginners to learn the drums from an early age. It comprises a full, 8-piece configuration with all mesh drum pad heads and a control module. Assembly is quick and easy, taking a matter of minutes. Its compact, foldaway design makes it perfect for home use and reassembly time and time again. USB and MIDI connections mean you can connect this kit to a computer for recording, composition or use as a MIDI controller.

### DD200X

The Digital Drums 200X Electronic Drum Kit by Gear4music proves it's never too late to start drumming. Perfect for teenagers and adults, the DD200X comes complete with seven 8" pads. At the heart of the DD200X lies the comprehensive drum module. Incredibly intuitive, every aspect has been purposely designed by our team of specialists to ensure your approach feels instinctive. With 38 drum kits, 44 songs and a metronome all instantly accessible

### DD400X

The DD400 has a super compact frame, making it ideal for bedrooms, small studios or practice spaces. A headphone output and a quiet kick drum pedal means you can practice without disturbing the neighbours. USB and MIDI connections mean you can connect this kit to a computer for recording, composition or use as a MIDI controller.

### DD400X

The DD400X mesh head profile offers the quietest possible playing experience. You'll be able to play at all hours of the day without disturbing your neighbours. Not to mention, these mesh heads offer a much more authentic drumming experience than standard rubber pads. USB and MIDI connections mean you can connect this kit to a computer for recording, composition or use as a MIDI controller.

**DD420X**

Take your drumming to the next level with all mesh pads. With a bounce that cannot be matched with rubber pads, the DD420X brings you closer to an acoustic kit. The DD420X offers 3 mesh toms and a mesh snare drum plus a crash, ride, hi-hat cymbals and a bass drum full kick pad. USB and MIDI connections can connect this kit to a computer for recording, composition or use as a MIDI controller.

**DD450+**

The DD450+ drum module is a big step up - it comes with a teaching function, a metronome and reverb, as well as a whole host of realistic voices and kits. It's equally suitable for beginners and advanced drummers. The MIDI connectivity means you can record your playing on a sequencer or trigger software on your PC or Mac.

**DD470X**

The DD470X is a mesh head kit, that offers a realistic playing experience. Ideal for beginners, this drum module features 10 great sounding preset kits, 203 separate drums sounds, as well as a coaching mode for honing rhythm and timing skills. The mesh drum heads utilise a unique non contact technology with adjustable sensitivity for a truly authentic practicing experience, that builds skills that can be transferred to an acoustic kit with ease

**DD480X**

The DD480X combines mesh drum heads and wooden shells to provide a great sounding kit suitable for beginners and professionals alike. With a completely versatile drum module, you are able to fully customise 30 kits, as well as mix each pad's volume individually. Also with a metronome and coaching mode, this drum kit not only provides an authentic playing experience but can be used to improve your skills as a drummer no matter your level.
