

DIGITAL STAGE PIANOS

COMPARISON CHART

SDP-1

The SDP-1 is a portable digital piano that gives you the true essence of piano. The keyboard has six levels of touch sensitivity and stereo speakers are packed into the keyboard, combined with both DC and battery power for portability. Choose from eight onboard piano voices, including a grand piano sound. The keyboard includes line out and USB for great connectivity.

SDP-2

The SDP-2 Stage Piano is a compact and lightweight instrument suitable for stage and home use. Featuring 88 touch-sensitive weighted keys, eight realistic voices and four integrated speakers, the SDP-2 is a popular choice for keyboardists and piano players. The keyboard includes a sustain pedal, power supply and music rest, so you have everything you need to get playing straight away.

SDP-3

The SDP-3 Stage Piano is a perfect instrument for home and performance use. The piano features 88 hammer-action keys with three levels of touch sensitivity, combined with 16 high-quality sounds including piano, organ and strings. Perform using the internal speakers or use the line out to connect to an amp or PA. The piano includes a host of effects including reverb and chorus, and you can even record to your computer via the USB audio output.

SDP-4

Lightweight and portable. Featuring 88 hammer-action keys and 20 detailed voices, the SDP-4 Stage Piano is the ideal choice for performing musicians. It's complete with MIDI and USB connections, letting you control virtual instruments and synthesisers at home and on the stage. These connections also let you record MIDI into your computer, giving you the opportunity to capture full performances and edit them in detail.
