## AW-12 subwoofer

Devised as a luxury bass option for our award-winning lifestyle sat-sub loudspeaker ranges, the AW-12 offers a heightened level of sophistication and deeper, cleaner bass frequencies from a compact, generously specified and beautifully crafted design.

With a front-firing 12" C-CAM driver, 500watt Class D amplifier and complementary high efficiency switch mode power supply the AW-12 is able to deliver full power with a continuous rating, equal to most

other subwoofers rated at 1000 watts. This means that even in the largest rooms, the AW-12 is able to perform cleanly, dynamically and with profound effect over extended periods of listening.

The AW12's luxury looks are no less impressive. Finished in a choice of two luxury gloss lacquers (Piano Black Metallic, and Piano White Metallic) and complete with aluminium side trims, the AW-12 has the build quality and design to blend with the richest of interiors.

<b>MODEL</b>	<b>AW-12</b>
