

Controlled Performance Series  
In-Ceiling & In-Wall Trimless Speakers

## 'Controlled' by Name and Nature

### Next Generation Controlled Performance Speakers

Ultra-discreet high performance sound for every room.

Given the choice, most home owners would favour great sound from 'invisible' speakers over traditional box designs. But as every custom installer will confirm, fitting drivers flush with room surfaces is only part of the solution. They know that sound quality relies as much on the acoustics of the void behind the walls and ceilings, as the size and shape of the room in front of them. This is why the challenge of achieving the wide, detailed, dynamic sound of box speakers - in a room without boxes - is made so much easier with Monitor Audio's new 'Controlled Performance' range. Unlike open-backed architectural speakers, the CP range is fitted with fully-sealed back-boxes. They are, in fact, brilliant miniature cabinet speakers optimised for in-wall/in-ceiling location. From no fewer than ten new CP models you'll enjoy the performance of a genuine Monitor Audio cabinet speaker, and the super-discreet qualities of near-invisible installation combined.

### **Award-winning speaker engineering, designed to disappear**

By adapting our world-famous driver technologies for the architectural speaker environment across four performance levels, we've ensured that the potency of a Monitor Audio CP system is as breath-taking as it is from its cabinet counterparts.

You'll experience naturally fluid dynamics generated by precision-engineered co-axial configurations of MMP®II or C-CAM® bass/mid drivers and our signature 25mm C-CAM dome tweeter. In each case the tweeter pivots to direct high frequencies for perfect imaging. To the range-topping models we've added the pivoting IDC® module, which houses both a midrange driver and tweeter to allow you to focus more frequencies toward the listening area. Fine-tune the sound for room acoustics with the high frequency control on each CP model and use the boundary controls on the higher performance models to remove any chance of bass boom.

With the breadth of choice available from CP, you'll have all the control you need to design stunningly involving, immersive audio for music and home cinema more easily and discreetly than ever before. And because of the enclosed nature of CP design, you'll enjoy a superior level of sound isolation between rooms and floors as well.

### **Easy, discreet, reliable installation**

Not only can audio be controlled for optimum results. New trimless bezels and super-discreet, paintable magnetic grilles allow the latest CP range to blend almost invisibly with walls and ceilings for a near-seamless integration with decor. Once easily and securely installed via Monitor Audio's patented Tri-Grip mounting, high reliability is assured by CP's airtight enclosure design, which protects each precision-engineered driver system against the damaging ingress of dust and dirt.

# The New CP Range

The range comprises eight two-way models in three performance levels - and two flagship three-way designs. All models from entry to flagship feature our signature 25mm Gold C-CAM dome tweeter.

## 100 Series 2-way

Offering high impact audio and discreet trimless design for smaller environments the entry-level CP-WT150 and CP-CT150 in-wall and in-ceiling models feature a 5" MMP®II bass driver, high frequency level adjustment (+3dB / 0dB / -3dB) and a pivoting C-CAM® tweeter.

## 200 Series 2-way

Deploying all C-CAM drivers, the next level CP-WT260 and CP-CT260 provide a wider and more detailed performance for home cinema and music applications. The pivoting C-CAM tweeter is joined by a 6" C-CAM bass driver - and high frequency level adjustment by a boundary compensation control for optimum bass tuning when positioned near room corners.

CP-WT150

CP-WT260

CP-CT150

## In-Wall LCR 2-way

The new CP-WT140LCR and CP-WT240LCR models are designed as multi-purpose LCR speakers. Either is ideal for installation as a dedicated centre-channel home theatre speaker, and in portrait or landscape orientations as a high performance music or theatre satellite. The entry-level CP-WT140LCR utilises twin 4" MMP®II drivers astride a C-CAM tweeter, the CP-WT240LCR, 4" C-CAM drivers. Working in tandem, the drivers offer greater radiating area than a single 6" bass driver, and consequently deliver improved efficiency, power handling and sound pressure levels from a compact design perfect for retro-fit installation. Both models feature high frequency level adjustment; the CP-WT240LCR, boundary compensation as well.

### 300 Series 2-way

Alongside a pivoting C-CAM tweeter, CP-WT380 and CP-CT380 models introduce powerful 8" C-CAM bass drivers featuring the Rigid Surface Technology (RST®) cone surfaces employed by our range-topping home audio speaker systems. RST uses a pattern of surface dimples to stiffen the cone for higher output and reduced distortion. A wider overall response and greater power-handling are attenuated according to taste by built in high frequency and boundary compensation controls.

### Flagship 3-way

Incorporating Monitor Audio's innovative, pivoting Inverted Dual Concentric (IDC®) midrange/tweeter module and 8" RST C-CAM bass driver, the three-way CP-WT380-IDC and CP-CT380-IDC represent the highest level of new CP performance. The IDC module houses a 4" C-CAM inverted midrange driver surrounding a 25mm C-CAM gold dome tweeter. The entire mid/tweeter unit can be pivoted and directed towards the listening space to provide optimal imaging with excellent midrange and high frequency detail. Improved driver specialisation, higher efficiency and power handling, and greater directivity combine in the three-way models to deliver an enhanced bass foundation for a naturally coherent response up to 30kHz. The in-wall CP-WT380IDC model includes midrange-frequency level adjustment and a die-cast aluminium front baffle for added rigidity, resulting in superior bass definition.

# Range Highlights

## Trimless design: all models

A 'stealthy' super-narrow bezel and paintable grille ensure a near-invisible blend with décor. The grilles attach magnetically to the speaker frame, allowing removal and re-fixing in seconds.

## Pivoting C-CAM® tweeters: all models excluding IDC

Created originally by aerospace engineers for jet-engine blades, Ceramic-Coated Aluminium/Magnesium exhibits the ideal properties for accurate sound reproduction, being extremely strong but very light. Advanced software simulation has allowed us to optimise our C-CAM tweeter design, bringing higher sensitivity and a wider bandwidth to reveal the finest high frequency detail up to 25kHz at entry-level and 30kHz in the flagship CP models. The CP tweeter is able to pivot through 15 degrees in all directions for optimum imaging.

## RST® bass drivers:

### CP-WT380, CP-CT380; CP-WT380-IDC and CT380-IDC

The advanced RST C-CAM cone surface is patterned with radial ridges, which reduce mass, increase stiffness and eliminate the bending associated with conventional metal cone designs. The result is a smoother, more agile response, better control of break-up and a wider dynamic range.

## Pivoting IDC® Module: CP-WT380-IDC and CT380-IDC

The Inverted Dual Concentric pivoting mid-range/tweeter module provides up to 18 degrees of movement, allowing speakers to be discreetly positioned and directed towards the desired listening zone. The design offers superior performance and flexibility over a typical 2-way or fixed angle speaker by utilising an inverted 4" C-CAM RST mid-range and 1" C-CAM dome tweeter, operating in a completely sealed chamber to provide accurate damping and perfect acoustic alignment.

## Tri-Grip® Mounting System: all models

Our innovative Tri-Grip system has three clamping points per dog-leg providing three times the surface area and a better surface seal maximising bass response and mid-range clarity. This design also features a cam allowing the clamp to move smoothly as the installer tightens the mounting screw.

### **Pre Construction Brackets**

Pre Construction Brackets are available for all models as an accessory to help mark speaker placement during framing and prior to sheetrock application. The brackets will span up to 24-inch stud spacing. Pre Construction Brackets are not required for retrofit applications.

### **Adjustable Response Controls**

Optimum imaging and set-up are established via pivoting tweeters, pivoting IDC driver modules, high-frequency, midrange-frequency, and/or boundary compensation controls (depending on model). The boundary compensation control provides a gentle midrange roll-off response, while preserving extreme low frequency output when the speaker is placed close to ceiling and wall boundaries.

# In-Wall Speakers

Boundary Compensation Control

Ultra-powerful Neodymium magnets

Rigid Cast-Aluminum Front Baffle

Pivoting IDC® Midrange/Tweeter Driver Module

High-Frequency Control

Midrange-Frequency Control

8" C-CAM® Woofer with RST® Cone Profile

**CP-WT380IDC Front**

Gold-plated Cable Terminals

Rigid Cast-Aluminum Woofer Chassis

Patented Tri-Grip® Mounting Clamps

Mineral-filled Controlled Performance Back Box

### In-Wall 5.1 Theatre

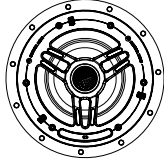

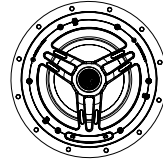

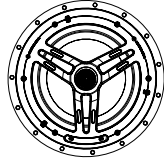

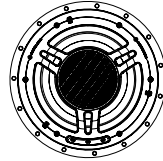

### In-Ceiling 5.1 Theatre

- A Front Left-Centre-Right main loudspeakers
- B Rear Left-Right surround loudspeakers
- C Add your choice of Monitor Audio subwoofer to complete the theatre
- D You can use in-wall front IDC loudspeakers with in-ceiling left-right surrounds if desired

6.1 and 7.1 Theatres:

Use three surround loudspeakers for 6.1 theatres and use four surround loudspeakers for 7.1 theatres
