	1 x optical (S/PDIF)
Controllable via	App („Pro-Ject Stream S2")
Weight	375 g (without power supply)
Dimensions	105 x 37 x 105 mm (WxHxD)

Stream Box S2: tiny, compact and advanced.

Stream Box S2 is our most affordable streamer yet, it offers support for high resolution data up to 24 bit / 192 kHz. It offers the possibility to connect to multiple Stream Box S2's and form a mulitroom setup. On top, two units can also be connected to build a stereo pair (with asigned left and right channel). Three different outputs guarantee a flexible solution for every audio chain. A line level RCA output can be connected to a pre-amplifier for purest signal, a dedicated variable output can be connected to active speakers or power amplifiers. The optical output can further pass a digital signal to an external digital to analogue converter. Stream Box S2 comes fully equipped with TIDAL and Spotify support as well as Airplay. Friends of internet radio will find satisfaction in Tuneln. A special App „Pro-Ject Stream S2" is available free of charge for iOS and Android devices.
