Discovery Z3 Features

Custom-designed woofer with aramid-fiber cone

Aramid fiber is employed in Z3's dual 4" woofers. Aramid fiber offers a superior strength-to-weight ratio and improved damping characteristics over conventional paper or plastic drivers. This added strength means arriving at designs that achieve a broader bandwidth with smoother response.

iOS and Android App

Doing away with a traditional remote control, a free smartphone/tablet application is available for download to simplify setup and allow for fine tuning.

Discovery ECO-System

As part of the Discovery Eco-system the Z3 makes it easier than ever to add music to another room in the house. All controlled with the Discovery Music Servers application.
