# KELLY MOUTHPIECES

## BRINGING COLOUR To Music!

Kelly Mouthpieces are made from lexan® polycarbonate and ABS, an extremely tough and resilient plastic, making them virtually indestructible. Kelly mouthpieces fit most brass instruments and as well as offering the same sound and better value over standard mouthpieces they also hold many other benefits over traditional brass mouthpiece designs:

- Virtually indestructible, they won't scratch or dent if dropped.
- Provides comfort in hot or cold weather performances.
- Available in a variety of attractive colours.
- Lighter with better feel.

Kelly Mouthpieces are also available in a "Crystal Clear" Lexan® finish, which provides educators and private instructors easy viewing of students' lip placement and aperture during playing time on an actual mouthpiece, with true pressure and resistance.

### Screamer Lead Trumpet

Lexan mouthpiece, designed specifically for lead trumpet. Available in crystal colours only.

66TPKS\*\*

### Trumpet

Lexan trumpet mouthpieces. Available in a variety of sizes and colours.

66TP1C\*\* (1C)
