- Available black, white, and red

iPhone® / iPad® / iPod touch® docking station with included cable. iPad® not included.

## FEATURES

### 1 Compact and Affordable DJ Controller

The DDJ-WeGO2 is a compact system that enables consumers and music enthusiasts alike to mix their own music creatively. Much like its predecessor, the DDJ-WeGO2 offers advanced functions and features that make the art of DJing fun and simple including Jog FX, Pulse Control, multi-color LED illumination, iPhone® / iPad® / iPod touch® compatibility (cable included), Virtual DJ™ Limited Edition DJ software for PC/MAC and additional support for other DJ software such as Algoriddim Inc.'s "djay." The DDJ-WeGO2 will be available in white, black and red to complement the user's preference taste. The controller also features multi-color LED backlighting for the Jog wheel, and a customizable (color) user interface for the included software.

### 2 Mixing Made Easy

• **DJ Software** – The DDJ-WeGO2 is bundled with the "Virtual DJ Limited Edition" software by Atomix Productions (Windows or Mac) that offers a broad range of functions for mixing songs, including making loops and creating samples, and mixing up to four channels for unlimited user creativity and mixes. The DDJ-WeGO2 has the ability to support other DJ software including Algoriddim "djay."

Virtual DJ Limited Edition

Algoriddim's djay® LE for mac DJ software

### 3 iPhone® / iPad® Cable (included)

The controller comes with a special cable that enables the unit to quickly be connected to a iPhone®, iPad®, or iPod touch® while the "djay 2" app provides instantaneous access and playback of music stored in a compatible iOS devices.

### 4 Various Visual and Audio Features

- **Jog FX** – Allows users to combine multiple effects and control them simultaneously using the Jog wheel.
- **Pulse Control** – Provides users with visual prompts with a variety of colored lights on the Jog platters:
  - **Mix Pulse** – Lights around the jog wheel show the beat of tracks in play. The lights lose intensity as the beats go out of sync, giving novices a visual aid to beat matching.
  - **Launch Pulse** – A red light travels from the Load button to the jog wheel when a track has loaded successfully so DJs know when a track is ready to play.
  - **FX Pulse** – The effect being applied to the currently playing song will not only be heard, but will also be represented visually via the light movements on the Jog wheel.

### 5 Other Features

- **USB Power** - The DDJ-WeGO2 utilizes power from USB connections found on most computers, eliminating the need for an external power supply.
- **Multi-Purpose Grip** - The controller features a convenient built-in dual purpose grip for transporting the unit as well as functioning as a stand for a connected iPhone® / iPad® / iPod Touch® device.
- Built-in audio ports for high quality sound input and output.
- Built-in sound card for expanded music storage and portability.
- Compact size (14.9" x 8.2" x 2.5") and weighs less than four pounds for easy transportation.
