

# uStream One

# QUICKSTART GUIDE

1. Find a suitable location for your uStream One speakers. Make sure the surface is stable with enough space for the power cable to be connected.
2. Insert the power cable into the 24v socket on the rear panel of each speaker.

3. Plug one end of the power cable into the socket on the power adaptor and the other end into a mains power socket. (Please note, there are two power cables included, one for Europe and one for North America. Please discard the cable you do not require). Turn the power switch on the rear of the unit to ON.

European  
mains cable

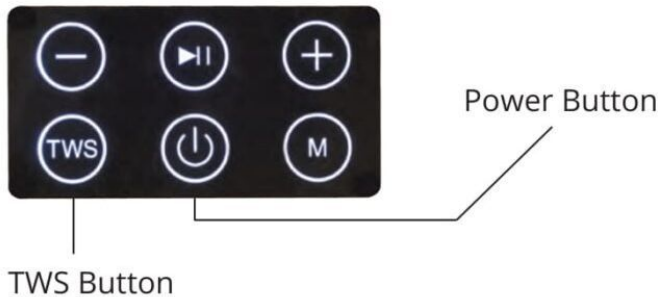

North American  
mains cable

A UK adaptor can be found in the bottom of the box to convert the European plug to work in a UK power socket.

4. Turn each speaker on by pressing the power button located on the top of each speaker. You will hear a voice command **'Power On'** to confirm, followed by the default mode, **'Bluetooth'**.

5. Once each speaker is powered on, press the TWS button on one of the speakers (not both). The voice command **'Connecting to speaker 2'** will be heard, followed a few seconds later by the voice command **'Speaker 2 connected'**
6. On the device you would like to connect to the speakers, look for **'uStream One'** on the list of available devices to connect to and select it.

The voice command **'Connecting to Bluetooth..Bluetooth connected'** will be heard.

7. Any sounds playable on your phone will now come from the uStream One speakers in STEREO.
8. Use the supplied remote control handset (point it at Speaker 1) to increase the volume to maximum. When maximum volume is reached you will hear a **'Beep'**.

Now you can use the volume control on your device to adjust the overall volume.
