

# GotoEQ

## Premium Equalizer

## Welcome!

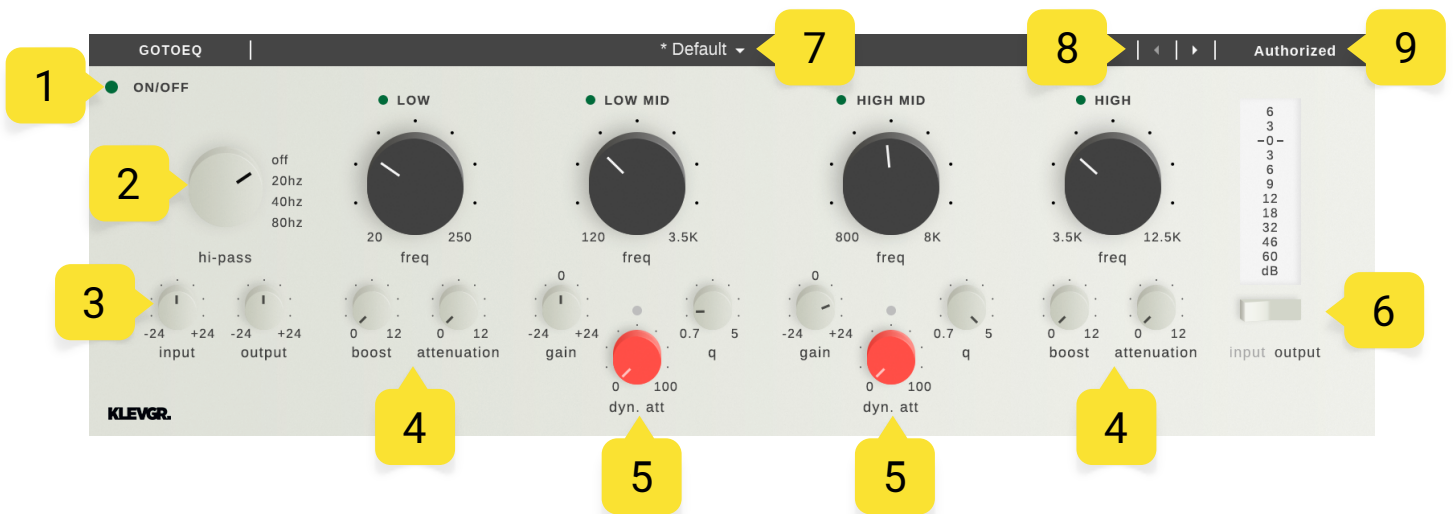

This is the user manual for **GotoEQ**, an equalizer plug-in effect available for iPad (AUv3) and Mac & Windows (AU/VST/AAX). It has been designed and developed by Klevgrand, a small studio in Stockholm, Sweden. GotoEQ consists of a high pass filter, two passive shelving filters and two dynamic parametric filters. It can be used as a master EQ, de-esser, spectral compressor or as an ordinary EQ.

[Get the iOS version at the App Store](#)

[Get the AU / VST / AAX version at klevgrand.se](#)

## Licensing (Desktop only)

Until unlocked, the plug-in will output 1 second of silence every 30 seconds. To unlock the full version, click the Authorize label (top right corner) and type/paste your license key.

## User Interface

### 1. ON/OFF

If turned off, the plugin will get bypassed.

### 2. HI PASS

Initial high pass filter. Choose between four different states: off, 20 Hz, 40 Hz, 80 Hz

### 3. INPUT GAIN / OUTPUT GAIN

Input and output gain trim. Altering the input gain will affect the dynamic processors.

## 4. LOW / HIGH FILTERS

These are the pultec filters (low shelf and high shelf). To achieve the pultec effect both boost and attenuation must be above 0 dB.

<b>Bypass (green dot)</b>	<b>Freq</b>	<b>Boost</b>	<b>Attenuation</b>
If turned off (grey), the filter will get bypassed.	Sets the frequency.	Positive gain.	Negative gain.

## 5. LOW MID / HIGH MID

These are the dynamic parametric filters.

<b>Gain</b>	<b>Q</b>	<b>Dyn. att</b>
Static gain level	Q value (in dB / oct)	(Dynamic Attenuation): Sets the internal compressor's reduction. The dot above shows the amount of audio reduction in real time.

## 6. INPUT OUTPUT METERING

Chooses if the VU-meters should show input levels or output levels.

## 7. PRESET LIST

Shows the current preset name. Click to reveal the factory preset list. If there's an asterisk (\*) in front of the name, the preset has been changed since initialization.

## 8. PRESET ARROWS

Quickly select the next/previous factory preset.

## 9. AUTHORIZE

If GotoEQ is run in demo-mode this can be clicked and an input box where to type/paste the serial will reveal.

# Specifications / System requirements

<b>Mac</b>	<b>Windows</b>	<b>iOS</b>
64 bit AU/VST/AAX plug-in macOS 10.7+ OpenGL	64 bit VST/AAX plug-in Windows 7+ with SP1 or higher OpenGL	AUv3 plug-in iPad Air 2 or better iOS 9.1+

GotoEQ adds 4ms latency.
