LUXE

## Audio Enchanter

Welcome!

This is the user manual for **LUXE**, an audio enhancing plug-in effect available for iPad (AUv3) and Mac & Windows (AU/VST/AAX). It has been designed and developed by Klevgrand, a small studio in Stockholm, Sweden. LUXE compresses and saturates an audio signal in a quite subtle but musical way. It's very useful for making a track "fit in the mix" and can be used on anything from a drum bus to a vocal track.

The slider sets the amount of the effect. Under the hood this parameter controls a set of internal (non-visible) parameters which makes LUXE an easy tool to use for quick results. The OUT knob sets the output volume and ranges from silence to +6 dB.

The FINESSE algorithm offers an alternate frequency response and adds some edge to the internal saturation module.

[Get the iOS version at the App Store](#)

[Get the AU / VST / AAX version at klevgrand.se](#)

LICENSING (DESKTOP ONLY)

Until unlocked, the plug-in will output 1 second of silence now and then. To unlock the full version, click the Demo label (top left corner) and type/paste your license key.

User Interface

1. AMOUNT

`0 - 100`

Controls how much the algorithm should process the incoming audio.

2. ALGORITHM SWITCH

`LUXE / FINESSE`

Switches between the LUXE and the FINESSE algorithm
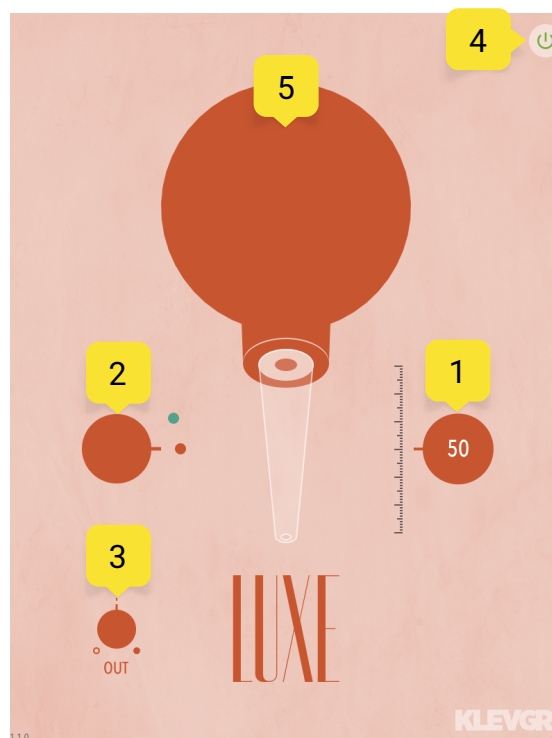

3. OUTPUT VOLUME

`-inf – +6dB`

Sets the output level.

4. BYPASS

Soft bypass of the plugin.

5. VISUALS

The round shape and the pin indicate how much the incoming audio is altered by the algorithm.

SPECIFICATIONS / SYSTEM REQUIREMENTS

Mac	Windows	iOS
64 bit AU/VST/AAX plug-in	64 bit VST/AAX plug-in	AUv3 plug-in
macOS 10.9+ OpenGL	Windows 7+ with SP1 or higher	iPad Air 2 or better iOS 9.1+
