

Pro Tools Inner Circle Member? Here's two sneaky Rob Papen upgrades you won't want to miss...

If you're a Pro Tools Inner Circle member, then you own Predator 3 PL - the streamlined super-synth from veteran plugin maker Rob Papen.

But by owning Predator 3 PL, you're now entitled to a very special upgrade to either:

- The full version of Rob Papen Predator 3
- The full Rob Papen eXplorer-8 bundle!

Links to access both upgrades are below.

Why upgrade from Predator-3 PL to full Predator 3?

Full Predator 3 means you get greatly expanded sound shaping potential over the included Predator-3 PL, adding complete control of all settings as well as containing a whopping 6100 presets – enough to keep music flowing for a very long time! Also, since Predator 3-PL is just an AAX plugin, it can only operate in Pro Tools. Owning full Predator 3 means you get VST3, VST, AU *plus* AAX, so you can make full use of Predator 3 in any other DAW you may own, too.

Why upgrade from Predator 3 PL to eXplorer-8?

For those who want it all, Rob Papen eXplorer-8 is the complete collection of *all* current Rob Papen plugins, giving you 28 unique synthesizers, drum plugins and effects covering the entire sound spectrum of synthesis from classic to modern, including delays, reverbs, and incredible sounding percussion. It naturally includes the full version of Predator 3 as well as all Rob Papen's other software, and can also be used in any DAW too.
