

Insane Performance at its Size and Price

HT/1003 MKII

a.k.a. The Hammer

Buy an HT/1003 MKII if you don't have the space or don't need the extra output of our larger models. It is simply a more compact but just as beautiful version of our larger models; it delivers identical build quality to its siblings. Its style makes it an ideal partner in HT/3D REL theatre setups with Serie T/x.

The all-new 300W Class D amplifier offers greater headroom and powers a new CarbonGlas™ 10" (250mm) driver. This combination delivers devastating output, playing twice as loud as the original. This type of performance is unheard of at this price point. The icing on the cake is that—like all the new HTs—it responds beautifully when playing music and HT-Air delivers state-of-the-art (optional) wireless.

Specifications

Type

Closed box, front-firing driver

Active Driver Size & Material

10 in., 250mm long-throw,
CarbonGlas™ cone structure,
inverted carbon fibre dust cap,
steel chassis

Low Frequency Extension

-6dB at 24 Hz
